
Project: Doki-Doki Start

Main Character racing helmet design request

30th October 2024

OVERVIEW

I'm currently working on a formula one themed manga for myself. I'm looking to improve my helmet pattern for the main character.

Character info

Name: Peyton Oshima

Nationality: Japanese/British

The theme of this manga is a romance manga. Peyton's love interest is his tomboy childhood friend/ personal trainer Maki Shūren.

His helmet/driver logo is that of a corgi. This is because his nickname on track is the "Silverstone pooch" and also a nod to maki because she has a soft spot for cutesy things despite her tomboy personality.

GOALS

1. Improve upon existing helmet Design/ driver logo
2. Help in further design development of my manga
3. Create a helmet pattern that can fit with all f1 Team sponsors
4. Just Have fun.

SPECIFICATIONS

Helmet Shell: Stilo ST6

Design inspiration: Ollie Bearman, Andrea kimi Antonelli, Lance stroll(Italian GP 2024 helmet design), Alain Prost, Elio de Angelis, Nigel Mansell, Giles Villeneuve

For the Logo/ Helmet pattern i want to incorporate my initials to the design, my Initials are P for my first name and O for my last name(the same as my OCs name).

for the overall design i want something that's modern but is simple.

If possible, try to incorporate his initials into the helmet pattern itself.

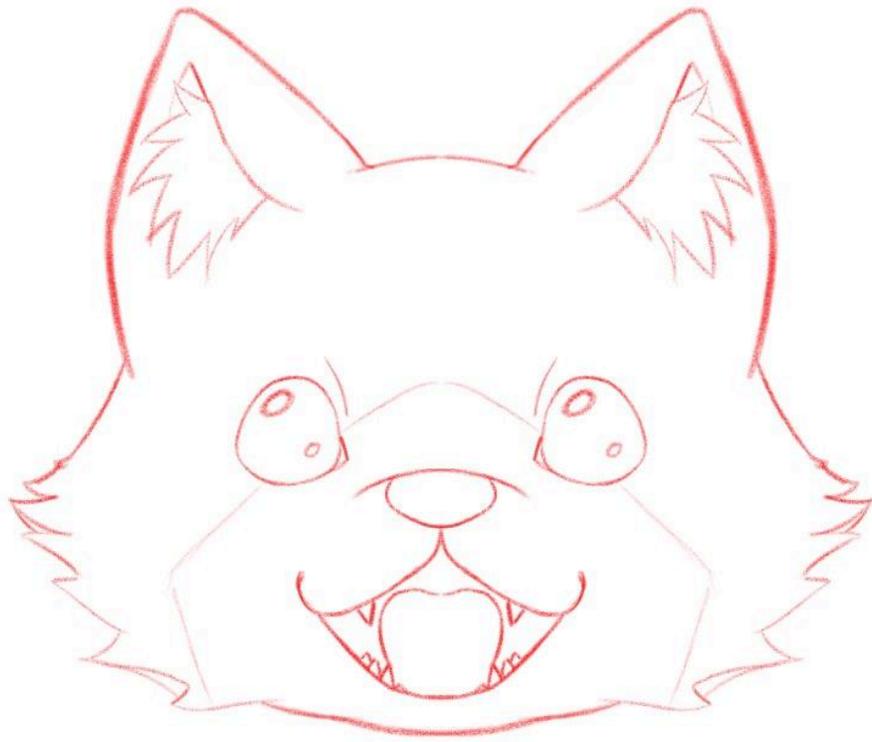

keep the tiny Union Jack on the front of the helmet as seen on the templates.

would like to see multiple drafts to see if i can mix some elements together
