

Akvelon Inc.

Position: Software Engineer

Project: [Scalyr](#)

About us:

Akvelon Inc (USA) works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest**, and many others). This is a great opportunity to transfer experience and experience with leading engineers of world-renowned companies.

We are looking for a **Software Engineer** for a project from **Scalyr**.

A bit about project:

Scalyr's mission is to provide a different approach to unified observability and log management that is built for modern application development and deployment practices. Founded by Steve Newman, who is also the Writely (aka Google Docs) founder and lead engineer, and led by tech industry veteran and CEO Christine Heckart, Scalyr offers an integrated and extensible suite of monitoring, management, visualization and analysis tools that aggregate and search all the signals needed for real-time observability, including logs, metrics and traces. We are the only observability and log management provider that does not index data and scales horizontally, is blazing fast and is ultra-affordable. The opportunity in front of us is huge and we are still in the very early days.
