

ClassLink Dashboard

Verify Password

When experiencing loading issues when accessing a ClassLink app, users may need to verify network password.

Verify Password When Prompted

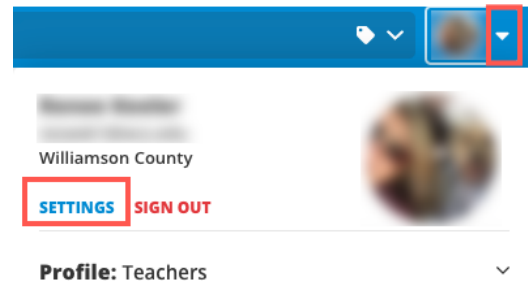

Occasionally, users may be prompted with the network password verification pop-up window.

If this pop-up appears, enter **WCS password** TWICE and **Submit**.

*If **Cancel** is selected and the password is not verified, some apps will not work properly.*

Verify Password When Not Prompted

After logging into the ClassLink Dashboard, select the **drop-down arrow** beside the profile picture and select **Settings**.

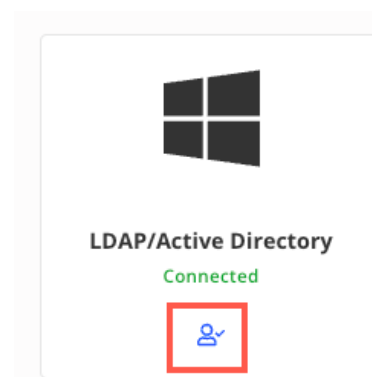

Select **Sign In**.

My Profile Settings

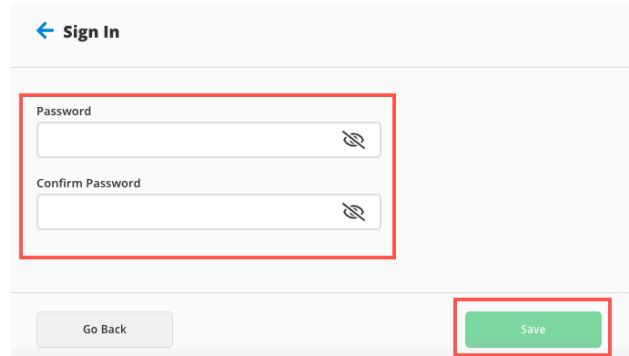

General Themes Passwords Auto Launch

Sign In

Select the **icon** below LDAP/Active Directory.

Enter **WCS password** twice and select **Save**.

The screenshot shows the 'Sign In' page of the ClassLink system. At the top left, there is a blue arrow pointing left followed by the text 'Sign In'. Below this, there are two input fields: 'Password' and 'Confirm Password'. Each field has a small icon on the right side that looks like a key or a lock. A red rectangular box highlights both the 'Password' and 'Confirm Password' fields. At the bottom of the page, there are two buttons: a grey 'Go Back' button on the left and a green 'Save' button on the right. The 'Save' button is also highlighted with a red rectangular box.

Sign out of ClassLink, then sign back in. Applications should now have the new password connected.
