ABSTRACT:*This template is used to format your paper and style the text. All margins, column widths, line spaces, and text fonts are prescribed, so please do not alter them. Please do not add page numbers, header or footer. After you have formatted your paper according to this guideline, your submission should have the same look as the paper template presented here. The Abstract should be brief, indicating the purpose/significance of the research. Please, do not use symbols, special characters, footnotes, or math in the paper title or abstract. The title and abstract play an important role in the communication of the research. Without a proper title and abstract, most papers may not be read or found* **(Times Roman 12: Italic)**

KEYWORDS:5 at least (Font : Time New Roman, Size : 12, Normal, interline 1)

* Corresponding author:

Introduction (Times Roman 12 template style: Heading 1)

The first line of the first paragraph of each section is not indented, but the others paragraphs are indented by 1 cm. The paper could be written in Arabic/ Tamazight/ English/ French/ Spanish/ German/ Russian/ Italian, Turkish/ Chinese and carefully checked for spelling and grammar before submission. The font of the paper must be Times New Roman (12) as the font for all text with 'justified' alignment and single-line spacing. (Times Roman 12 template style: Paragraph first)

Document format

The paper size should be in A4 format.

Authors should submit their original work in MS Word format (.doc/.docx) by using our online paper submission system. (ASJP Platform)

Elements of the paper

The basic elements of the paper should be listed in the following order: Title of paper, Authors' names and affiliations, Abstract and Keywords, The main body of paper (including figures and tables), Results and discussions, Conclusions, and References. Please do not exceed the page's margins with tables, text, or figures.

Table and figures

Figures, tables, must be inserted in the text and may not be grouped at the end of the paper. Tables and figures must be numbered, centered and should be placed close after their first reference in the text. Please double check the numbering of these elements before you submit your paper. The table headings should be centred below the tables. Figures and tables not cited in the text should not be presented. The following is an example for Table 1.

Example column 1	Example column 2	Example column 3

Table 1. Title of the Table

The figure captions should be below the figures. All figures should be of high quality, legible and numbered according to sequence below each figure. Figure captions and table headings should be sufficient to explain the figure or table without needing to refer to the text.

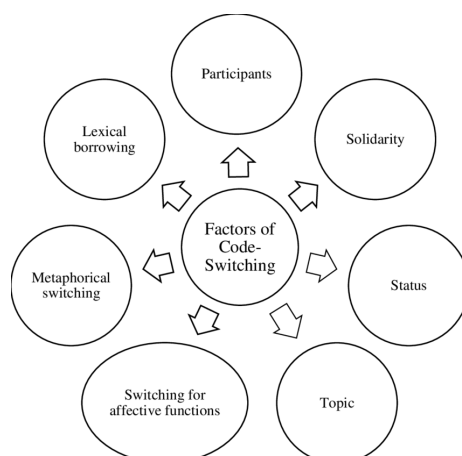

Figure 1. Title of Figure 1 (Template style: Table caption)

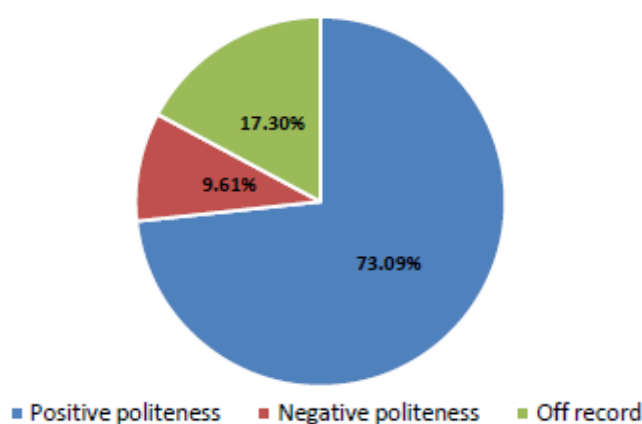

Figure 2. Title of Figure 2

Conclusions

AMNIR Journal editors will appreciate it if you would follow these guidelines. If you do not conform to the required formatting, your paper will be return for correction.

Acknowledgments (Optional)

If any, should be placed before the references section without numbering.

References must be in alphabetical order according to the last name of the author in the list of references. In text place the Author's last name, the Year of publication, and Page number inside the parenthesis e.g., (Weinstein 2009, 25). The complete details of the references will appear in the list of references. Unless there are six authors or more give all authors' names, do not use "et al." Please include in the References list only those references that were actually cited in the text of the paper. All work that is cited in the text also needs to be in the References. There must be a total agreement between the two. We recommend at least 20 quality references should be cited. References should follow the format in the below examples.
