

This is a serious one G's it's for a potential client I want this copy to be as perfect as it can get, so please of course you can teach me how I can improve my writing skills in the future but I will appreciate it more if you help me by giving suggestions for this one

Target market:

- People who think it's hard to make 100 grand a year online and believe that it takes a significant amount of work**
- People who want to make 100 grand a year by building niche websites**
- People who want to save time and money while building profitable websites.**

Target market pain points

- Lack of time and expertise**
- Lack of knowledge**
- Worrying about continuously adding and updating website content**

How can this product help the target market?

- it provides website templates so that the reader doesn't have to worry about the best design for his website, he can just copy/paste the template**

What does the E-book bundle contain?

- 1. Website Guide to a Profitable Website Portfolio - 23 pages**
- 2. NameHero Server Setup Guide - 9 pages**
- 3. Google Ads Guide to Driving Traffic - 31 pages**
- 4. Effective Website Monetization Guide - 18 pages**
- 5. Website Template Files + Instructions - 3 folders, 22 files**

The whole point of this product (the bundle) is to help customers build profitable mini-tool websites while saving you a ton of time and money!

Subject line: How to actually build profitable websites...

Making \$100K/year by creating small websites is surely impossible, right?

Wrong.

You might think it's impossible because you lack understanding of how to actually build a profitable website.

But in reality:

- You don't need much knowledge about SEO**
- You don't have to work on your website 24/7**
- and it doesn't take that much effort.**

I used to think like you.

I was searching online for all the knowledge I could find about building a website, and I even bought many coding books.

At the time, creating one website took all of my energy because I used to think I needed to put in a lot of effort.

It got to the point where I lost hope and thought that this isn't for me.

Then I found the solution.

I thought instead of constantly creating new websites, I should create a bunch of templates that I can copy/paste to create new websites.

And I used these templates to create 6 small websites that generate about **\$8,000/month** in total.

Check out an example of a website I created [HERE!](#)

I have simplified the process to the point where all I have to do is re-use my proven template files.

Which is saving me about **90% of development time.**

And guess what?

You can use this technique too!

You don't have to worry about wasting time and constantly updating and adding content to your website.

I provide an E-book bundle that has all of my secrets about creating and generating profits from your websites.

You will save a ton of time and effort by using the information included in the bundle as opposed to figuring out things on your own.

The choice is yours now
