

Categorizing thinkers is way underserved.

It would be natural to come up with some features of thinkers, measure thinkers against those features, and put them on a plot or cluster in thinker space.

Categorizing thoughts themselves has a similar motivation to it.

Communities are soft definitions of types of thinkers. I could source this from [Memetic Tribes](#).

1. Domain in which thinker had their 'intellectual renaissance' or transition to intellectual maturity
2. Thinkers by thinking style
3. Types of thought
4. Trajectories in thinking style over time
5. [Distinctions in Conceptual Style offers a few distinctions](#)
6. Ken Wilbur's Integral Theory
7. [Modes of Thinking Worth Internalizing](#)
