SETUPS

Please choose the setup according to your playstyle and total prestige.

Don't know what a permاسlot is? Skip to: [📖 Permaslot guide](#)

NOTE: "Active" denotes a playstyle centered around making cookies with golden cookie effects (especially through click combos), while "Idle" is a playstyle around letting the game produce cookies WITHOUT golden cookies (in other words, afk; also includes non-golden cookie auto clickers)

If you are active at all, stay on active setups.

FOR ACTIVE PLAYERS

First ascension

After 365 prestige but before second permanent upgrade slot

I: Highest kitten upgrade

- If you have the Santa and it isn't gonna be Christmas after you've reincarnated, permاسlot A festive hat instead; revert after Season switcher is obtained

After second slot

After purchasing Permanent upgrade slot II but before Fortune Cookies heavenly upgrade (costs 77.78 billion heavenly chips)

I: Highest kitten upgrade

II: Serendipity (second golden cookie frequency doubling upgrade)

III: Lucky day (first golden cookie frequency doubling upgrade)

IV: Highest Cursor upgrade (NOT "Clicking gain +1% CpS"; switch to most expensive building biscuit after Undecillion fingers become purchasable in around 2 minutes into a run)

V: Golden goose egg/Cookie egg/Most expensive building biscuit/Most expensive flavored cookie

- (Building biscuits are upgrades you unlock for having at least 100 to 700 of every building, are rectangular, and are the "butter biscuits" that add 10% to cookie

production multiplier. If you have them, you can find them at around the end of your cookies page)

- Slot these upgrades as you unlock the slots
- For V, if you have more than one of the above the leftmost upgrade takes priority

Past this point ordering doesn't matter at all

Before late game

after Fortune cookies, before Unshackled you heavenly upgrade (costs 19.2 quadrillion heavenly chips)

I: Serendipity

II: Lucky day

III: Fortune #103/Cookie egg/Fortune #101/Fortune #104/Highest You upgrade (if you have more than one of the above the leftmost upgrade takes priority)

IV: Golden goose egg/Cookie egg/Most expensive flavored cookie

V: Most expensive building biscuit

- For IV, if you have more than one of the above the leftmost upgrade takes priority

To endgame

After Unshackled you, to the last cookie related achievement (1 trevigintillion cookies in one ascend)

I: Highest You upgrade

II: Most expensive building biscuit

III: Second most expensive building biscuit

IV: Most expensive flavored cookie (as in costs the most amount of cookies to buy if it is already unlocked)

V: Fortune #103

In endgame

After the last cookie related achievement

Whatever you slot doesn't matter that much anymore, so here's a generalized setup for no-savescum no-planner people trying to get more cookies via comboing:

I: Personal biscuit

II: Springerles (most expensive flavored cookie)

III: Fortune #101 or Fortune #104

IV: Golden goose egg

V: Fortune #103

- Feel free to swap the golden cookie frequency upgrades for fortunes if you are not planning on doing noscum combos involving dragonflight.

FOR IDLE PLAYERS

First ascension

After 365 prestige, before Fortune cookies heavenly upgrade (costs 77.78 billion heavenly chips)

I: Highest kitten upgrade

II: Highest upgrade of the last building you managed to get

III: Highest building biscuit

IV: Highest Cursor upgrade; switch to Golden goose egg for extra golden switch power after you become able to purchase Undecillion fingers around a minute into a run

V: Wrinklerspawn; if don't have that yet, slot second most expensive building biscuit

- (Building biscuits are upgrades you unlock for having at least 100 to 700 of every building, are rectangular, and are the "butter biscuits" that add 10% to cookie production multiplier. If you have them, you can find them at around the end of your cookies page)
- Slot these upgrades as you unlock those slots
- You may also want to slot in Lucky day or Serendipity (or both) for golden switch power if you are never planning on clicking golden cookies ever again

Before late game

After Fortune cookies, before Unshackled you heavenly upgrade (costs 19.2 quadrillion heavenly chips)

I: Fortune #101

II: Most expensive building biscuit

III: Fortune #103

IV: Golden goose egg

V: Wrinklerspawn

Before endgame

After Unshackled you

I: Highest You upgrade

II: Most expensive building biscuit

III: Highest flavored cookie (as in costs the most amount of cookies to buy if it is already unlocked)

IV: Fortune #103

V: Wrinklerspawn/Fortune #101 (depending on how often you click fortunes; if you almost never click fortunes, slot Fortune #101)

MISCELLANEOUS

Endless cycle/Reincarnation achievement

I: Highest kitten upgrade

II: Second highest kitten upgrade

III: Subsequent highest kitten/highest You upgrade/highest Cursor upgrade

IV: Subsequent highest kitten/subsequent highest You upgrade/subsequent highest Cursor upgrade

V: Subsequent highest kitten/subsequent highest You upgrade/subsequent highest Cursor upgrade

- What you choose for III, IV, and V really depends on the strategy (primarily buying cursors or yours) you are using for ascends.
- If buying cursors: Get every cursor upgrade that you can't easily afford in around 6 seconds into ascending
- If buying yours: Get every kitten upgrade that you can't easily afford in around 6 seconds into ascending
- If using the fractal-cursor Strat: ignore all cursor upgrades and just get 5 best kittens
- Note: if you can afford every kitten except for the top four with ONLY the top four kittens slotted, permastot Fortune #103 in the last slot. This also applies if you can do the same with less than four kittens.

DO ASS CLGCF Permaslots

I: Serendipity

II: Lucky day

III: Golden goose egg

IV: Highest You upgrade

V: Highest Javascript console upgrade

- May switch out highest javascript console upgrade for A crumbly egg if "Simulation failsafes" (glimmeringue Javascript console upgrade) can be reasonably bought in around 2 minutes in.
- This setup assumes a late game (post Unshackled you) save.

PERMASLOTS OVERVIEW

Permaslot stands for Permanent upgrade slots, a set of 5 heavenly upgrades where one can place normal upgrades into to make it immediately available and active for all subsequent ascensions. There are five permaslots. Every permaslot is functionally identical in every way except for its price.

Note: that once an upgrade is permaslotted, it cannot be bought again in an ascension where it remains in a permaslot, and so permaslots cannot grant any actual boosts, and merely moves boosts earlier in time to the very start of an ascension depending on what upgrades you have slotted.
