Abstract (Center, 12 pt)

A concise abstract is required. The abstract should be informative and state briefly the aim of the research, the principal results and major conclusions. An abstract is often presented separately from the article, thus it must be able to stand alone (completely self-explanatory). References should not be cited, but if essential, then cite the author(s) and year(s). Abbreviations should be avoided, but if essential, they must be defined at their first mention. **(12 pt)**

Keywords: Keywords is about five words, covering scientific and local name (if any), research theme, and special methods which used; and sorted from A to Z. Separated using semicolons (;) **(12 pt)**

Abbreviations (if any): All important abbreviations must be defined at their first mention there. Ensure consistency of abbreviations throughout the article. **(12 pt)**

Running title (if any): a short title with five words **(12 pt)**

1. INTRODUCTION (CENTER, 12 PT)

Introduction is about 400-600 words, covering the aims of the research and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Indicate the aims of research in the last paragraph. **(12 pt)**

Manuscript of original research should be written in no more than 8,000 words (including tables and picture), or proportional with articles in this publication number. Review articles will be accommodated, while, short communication should be written in about 2,000 words, except for pre-study.

Manuscript is typed on white paper of A4 (210x297 mm²) size, in a single column single space, 10.5-point Times New Roman font, with margin text from the top is 2 cm, from the bottom is 2 cm, left and bottom are 1.7 cm. Smaller lettering size can be applied in presenting table and figure (12 pt). Word processing program or additional software can be used, however, it must be PC compatible and Microsoft Word based (.doc or .docx). Equation of mathematics does not always can be written down in one column with text, in that case can be written separately. Number one to ten are expressed with words, except if it relates to measurement, while values above them written in number, except in early sentence. The fraction should be expressed in decimal. In the text, it should be used “%” rather than “percent”. Avoid expressing ideas with complicated sentence and verbiage, and used efficient and effective sentence.

Citation in manuscript is written in “name and year” system; and is arranged from oldest to newest and from A to Z. In citing an article written by two authors, both of them should be mentioned, however, for three and more authors, only the last (family) name of the first author is mentioned, followed by et al. (not italic), for example: Saharjo and Nurhayati (2006) or (Boonkerd 2003a, b, c; Sugiyarto 2004; El-Bana and Nijs 2005; Balagadde et al. 2008; Webb et al. 2008). Extent citation as shown with word “cit” should be avoided. Reference to unpublished data and personal communication should not appear in the list but should be cited in the text only (e.g., Rifai MA 2007, pers. com. (personal communication); Setyawan AD 2007, unpublished data). A total of 80% of the references should be from scientific journals published in the last five years, except for taxonomic studies. Names of journals should be abbreviated according to the ISSN List of Title Word Abbreviations (www.issn.org/2-22661-LTWA-online.php).

2. MATERIALS AND METHODS (12 PT)

2.1. Study Area (12 pt)

Materials and Methods should emphasize on the procedures and data analysis. For field study, it is better if study site is included (Figure 1).

2.2. Procedures

Sub-procedures-1 (replace with your sub-sub-title of procedures)

Xxxxxx.

Sub-procedures-2

Xxxxxx.

Figure 2. Peralite and Pertamina Fuel Consumption Curves Over Distance (Center, 12 pt)

2.3. Data analysis

Xxxxxx.

3. RESULTS AND DISCUSSION

Results and Discussion should be written as a series of connecting sentences, however, for manuscript with long discussion should be divided into subtitles. Results should be clear and concise.

3.1. Result-1 (replace with your sub-sub-title of result)

Figures and tables of maximum of three pages should be clearly presented. Number tables consecutively in accordance with their appearance in the text. Title of a picture is written down below the picture, while title of a table is written above the table. Colored figures can only be accepted if the information in the manuscript can lose without those images; chart is preferred to use black and white images. Author could consign any picture or photo for the front cover, although it does not print in the manuscript. All images property of others should be mentioned source. There is no appendix, all data or data analysis are incorporated into Results and Discussions. For broad data, it can be displayed on the website as a supplement (Figure 2; Table 1).

3.2. Result-2

Xxxxxxxxxx (Table 2).
 Xxxxxxxxxx (Figure 3).

3.3. Discussion

Thorough discussion represents the causal effect mainly explains for why and how the results of the research were taken place, and do not only re-express the mentioned results in the form of sentences, not repeat them. Concluding sentence should be given at the end of the discussion.

Table 1. Criteria for Temperature Humidity Index (Center,12 pt)

No	Criteria THI (Center,12 pt)	Comfort Level
1	THI < 29 (12 pt)	Comfort
2	29 < THI < 30.5	Discomfort
3	THI > 30.5	Very Discomfort

4. CONCLUSION

The conclusions of the study may be presented in here.

5. ACKNOWLEDGEMENTS (IF ANY)

Acknowledgments are expressed in a brief; all sources of institutional, private and corporate financial support for the work must be fully acknowledged, and any potential conflicts of interest are noted.

6. AUTHORS' CONTRIBUTIONS (IF ANY)

Example: Sugiasih & Sugiyanto designed the study. Sugiasih carried out the laboratory work. Sugiyanto analyzed the data. Sugiasih & Sugiyanto wrote the manuscript. All authors read and approved the final version of the manuscript.

7. COMPETING INTERESTS (IF ANY)

The authors declare that there are no competing interests.

8. FUNDING (IF ANY)

The authors declare funding if any.
