

**Name:** Robin Kurosawa

**Face claim:** <http://www.zerochan.net/1689298> this is all I got.

**Normal attire:** Exactly as pictured. Usually black attire, often with sky blue as well.

Personality: Jokester, childlike (since he's only 14). Robin likes to sit atop high places and cause a bit of chaos/pull a few pranks. He loves his dolls to bits, since they help him with his fun.

Everything's funny as long as he gets away with it, but if he gets caught and reprimanded, he'll feel ashamed. He's serious in serious fights.

**Primary Magic:** [Human Possession](#)

**Secondary Magic** (that I would like): [Dark Écriture](#)

Robin passively can control up to two souls (this can be increased with progressions). These normally take the shape of Teru Teru Bouzu dolls (like in the face claim picture), but the souls can be moved to other objects as well.

Spell 1 name: Bouzu Blast

Magic Type: Human Possession (Primary)

Cooldown: 2 turns for single doll beam, 3 for double doll single beam, 4 for double doll beam

Range: 50 meters

Effect: One or both dolls can fire a beam that can hit the same or different targets. A single beam is more powerful if both dolls fire while in contact with each other. Firing with both dolls requires Robin to remain immobile in order to concentrate.

Spell 2 name: Bouzu Bind

Magic Type: Human Possession (Primary)

Cooldown: 4 turns

Range: Dolls must be within 10 ft of each other

Effect: A rope of magic forms between the two dolls. This rope can wrap around opponents and bind them, can be climbed, or used as any normal rope would. The dolls can continue to be controlled by Robin, but Robin will need to be immobile in order to concentrate if he means to maintain the rope and control the dolls at the same time. Robin can move and still have the rope if he gives up control over the dolls. The dolls then become limp like normal objects.

Spell 3 name (to go with when I get Dark Écriture): Escape

Magic Type: Dark Écriture (Secondary)

Cooldown: Out of Combat Ability, cd is 3 hours before another portal can start to be set up

Range: Portal travel distance is 20 ft, best used to get through a house or wall

Effect: Robin takes 30 minutes to prepare a portal on a solid surface that will create another portal on a solid surface at most 20 ft away. This portal will last for 10 minutes unless closed prematurely and can be used by anyone. The portal's max size is 15 sq ft. The portal is black,

so it does not give a visual of the destination, though the destination can be seen as it is prepared. Passing through it feels like passing through a swampy membrane.
