EDUCATION

- 2020 **Ph. D. Communication Studies, University of Utah**
Dissertation: *Articulating Geoengineering as Good Science: Urgency, Optimism, and Ideology in the Anthropocene*
Committee: Sean Lawson (Chair), Robin Jensen, Rob Gehl, Glen Feighery, Brett Clark
- 2015 **M.A. in Communication Studies, University of Montana**
Thesis: "Blended Framework: Bill McKibben's Use of Melodrama and Comedy in Environmental Rhetoric."
Committee: Sara Hayden (Chair), Joel Iverson, Phil Condon
- 2012 **B.A. in Rhetoric and Media Studies, Willamette University**
Minor: Environmental Science

ACADEMIC APPOINTMENTS

The University of Montana

2023-Present Assistant Professor of Rhetoric, Department of Communication

Merrimack College

2020-Present Lecturer, Communication & Media

The University of Utah

2016-2020 Teaching Fellow, Department of Communication

The University of Montana

2013-2015 Teaching Fellow, Department of Communication

AWARDS AND HONORS

- 2025 Helen and Winston Cox Educational Excellence Award for Tenure-track Junior Faculty in the School of Humanities and Sciences, University of Montana.
- 2024 Top Paper, Organizational Communication Division, Western States Communication Association, 2024.
- 2021 Top Paper, IECA, Conference on Communication and the Environment, 2021.
- 2020 Top Paper, Communication Theory Division, Western States Communication Association, 2020.

Cullinan, M. E. (2019). Defining 'local' and 'access': Trump's rhetorical construction of federal overreach in the designation of Bears Ears National Monument. *Western States Communication Conference*. Environmental Communication Division. Seattle, WA

TEACHING

The University of Montana

COMX 555: Seminar in Rhetorical Theory & Criticism, F2025

Rhetorical theory allows us to begin to understand how symbols function and rhetorical criticism is one of the processes through which we assess specific symbolic acts. In this course, we will explore issues and current trends in rhetorical criticism aided by the ideas of rhetorical theory. During this course, students will learn to analyze and interpret texts by applying the concepts, questions, and theoretical paradigms discussed in class and in the assigned readings.

COMX 591: Communication of Nature & Gender, (One Section) SP2024

Drawing on the work of theorists, historians, philosophers, environmental activists, writers, and filmmakers, students will consider how cultural depictions of nature and gender inform our own relationships with the more-than-human world. Where ecofeminism frequently links the exploitation and domination of women to that of the earth, queer theory opens up possibilities for new relationships with the environment that are at odds with what is “normal” or “dominant.” Queer, which is used here to mean “to destabilize” or to put “off-center,” becomes a playful move in relation to contemporary ecological destruction and opens up optimistic alternatives to current practices surrounding consumption, reproduction, and activism.

COMX 491: Rhetoric of Health & Medicine (SP2025)

This course introduces students to issues concerning health disparities, medical dissensus, public understanding of science, and the racialization of epidemics, as well as other issues related to health communication. Through the intersections of writing, research, and rhetoric, particular attention is given to the interdisciplinary theories and concepts shaping the health communication field in the twenty-first century.

COMX 491: Visual Rhetoric (SP2025)

This course centers on some of the major principles surrounding visual communication: physio-psychological bases of perception, cognition, semiotics, and the history that lead to the realization of visual images. Lectures, discussions, and analyses of visual artifacts include the ethical dimensions of visual image-making, as well as critical/cultural analysis of contemporary visual images across all media.

COMX 391: Science Communication (One Section: F2024)

This course explores the concept of science communication. Students will evaluate existing science communication efforts, review factors that influence science communication, and work to cultivate a range of skills to communicate complex science information to a variety of publics.

COMX 347: Rhetoric of Nature & Environmentalism, (Two Sections: F2023, F2024)

The purpose of this course is to better understand how participants in environmental communication struggle for control over discourse—the words, images, narratives, and arguments used to perceive the natural world, define human relationships with that world, and negotiate individual and societal decisions about environmental issues.

COMX 204: Introduction to Rhetorical Theory, (Three Sections: F2023, SP 2024, F2024)

This class provides students with a broad overview of rhetoric from its origins in Ancient Greece to the modern-day forums of social media. We will cover key concepts, definitions, and assumptions of the rhetoric in order to examine the relationship between language and power. By

exploring the role of rhetoric in cultural discourse, students will be able to critically analyze and identify rhetorical strategies used in various types of media.

Merrimack College, Fall 2020-Spring 2022

COM 5620: Communication and Leadership, S2022

The purpose of this course is to familiarize graduate students with key principles of leadership, as well as to demonstrate how communication informs both the theory and practice of guiding others toward common goals and ethical outcomes.

COM 5360: Writing for Strategic Communication, SP2022, F2022

This graduate level course is designed for those who wish to improve their writing skills in the multi-faceted disciplines found within strategic communication. In order to work in the communication field, employers agree that the skill of clear, concise, and interesting writing is the number one prerequisite. In this writing-intensive course, students practice different styles of strategic writing, peer evaluation, and editing.

COM 4900: Senior Seminar, SP2023

Prepares students for graduation by taking stock of what they have learned, carefully considering their strengths and interests, and preparing themselves to stand out in the job market or graduate school application process. By the end of this course, students will have created materials and cultivated skills to demonstrate the successful completion of a degree in Communication & Media Studies.

COM 4625: Health Communication, SP2021

Responds to increasing interest and demand for greater awareness and understanding of health communication: that is, the study of how communication about health is co-created, transmitted, received, constructed, and circulated in various contexts.

COM 3742C: Community & Nonprofit Organizing, SP2023

Develops students' understanding of organizational and strategic nonprofit communication in a variety of contexts. Through various course materials, students will ultimately be able to employ a communication perspective on nonprofit work and engage audience-specific strategic nonprofit communication skills.

COM 3360: Visual Communication, F2021, F2022

Centers on some of the major principles surrounding visual communication: physio-psychological bases of perception, cognition, semiotics, and the history that lead to the realization of visual images. Lectures, discussions, and analyses of visual artifacts include the ethical dimensions of visual image-making, as well as critical/cultural analysis of contemporary visual images across all media.

COM 3011: Special Topics, Science, Health, & Environmental Communication, SP2021

Provides students with an overview of how these topics tend to be communicated in contexts ranging from the mass media to public hearings to patient-provider interactions. I co-taught this course with another graduate student. We compiled a syllabus together, wrote exams, and designed discussions for a large-lecture course. We encouraged students to break down the

symbolic practices facilitating such communication and assess their associated consequences in terms of lay beliefs about issues such as climate change, pandemics, nanotechnology, and genetics. We placed our emphasis on understanding what research describes as best practices in terms of persuasively and accurately communicating about science, health, and the environment to various audiences.

COM 2801: Introduction to Communication, SP 2022, F2022, SP2023

This course provides an overview of contemporary communication theory and seeks to offer the background students will need to succeed in a communication studies major. This course introduces major theoretical approaches and situational contexts in communication research. The class will create a climate in which students will be able to systematically evaluate existing communication theories and begin to develop their own theoretical positions.

ESS 1050: Environmental Studies Gateway, F2020, F2021

This introduction to the ESS major asks students to approach environmental problems in a variety of ways. By exploring how different disciplines approach the question of sustainability, students become more capable of understanding the social narratives that lead to unsustainable behaviors, exploring the problems of living in an advanced, post-industrial society.

COMM 1020: Public Communication, F2020, SP2021, S2021, F2021

Covers theory and skills of speaking in various public settings. Examines fundamental principles from rhetorical and communication theory and applies them to oral presentations.

University of Utah, Fall 2016-Fall 2019

COMM 3405: Classical to Contemporary Rhetoric, S2018, S2019

Provides students with a broad overview of rhetoric from its origins in ancient Greece to the modern-day forums of social media. I designed this course to cover key concepts, definitions, and assumptions of rhetoric in order to examine the relationship between language and power and how these relationships manifest in our lives today. By exploring the role of rhetoric in cultural discourse, students will be able to critically analyze and identify rhetorical strategies used in various types of media.

COMM 3115: Communicating Science, Health, and the Environment, SP2018

Provides students with an overview of how these topics tend to be communicated in contexts ranging from the mass media to public hearings to patient-provider interactions. I co-taught this course with another graduate student. We compiled a syllabus together, wrote exams, and designed discussions for a large-lecture course. We encouraged students to break down the symbolic practices facilitating such communication and assess their associated consequences in terms of lay beliefs about issues such as climate change, pandemics, nanotechnology, and genetics. We placed our emphasis on understanding what research describes as best practices in terms of persuasively and accurately communicating about science, health, and the environment to various audiences.

COMM 3030: Communication and Social Responsibility, S2017, F2017, S2020

Centered on questions of “what does it mean to be socially responsible?” and “what does it mean to communicate in a socially responsible way?” I designed this course entirely on my own,

compiling a syllabus, designing assignments, and moderating discussions that explore the central questions above through a rhetorical lens and apply them to historical and contemporary moments of significant social, cultural, historical, and political interest, discussing the role of the “public” in a democracy and what it means to be an “engaged citizen” in the 21st century. My goal is to help students develop sophisticated positions on modern social issues and communicative practices that they can defend both in writing and in speech.

COMM 1610: Introduction to News Writing, F2019

This is a practical application course which teaches the basics to media writing for journalism and public relations or strategic communication careers. My students practice gathering information, verifying facts, and writing on deadline. They use a variety of sources, write clear, compelling leads, and tell stories--using quotations and description to bring narratives to life. In addition to teaching students to engage with public audiences, I require my students to create a final portfolio of their reporting work.

COMM 1500: Intro to Media Business & Ethics, Instructor of Record, SP2019, S2019, F2019
Provides an analysis of how people really pay for “free” media. I require students to understand basic business concepts in various media—and how they sometimes lead to ethically problematic practices. My students define their version of media ethics and apply it to a media case study, while learning technological, economic, historical, legal, and ethical foundations of media.

COMM 1020: Principles of Public Speaking, F2016, SP2107, F2017

Covers theory and skills of speaking in various public settings. Examines fundamental principles from rhetorical and communication theory and applies them to oral presentations.

SERVICE

Service to the Department

- 2025 Unit Standards Committee, University of Montana, (Oct. 2024-April 2025).
Scholarship Committee, University of Montana, (Dec. 2024-March 2025).
Co-Advisor for Lambda Phi Eta, University of Montana
Second Committee Member for Alexa Runnion, M.A. (2025), Department of Communication.
Second Committee Member for Sylvie Coston, M.A. (2025), Department of Communication.
- 2024 Interim Advisor for Lambda Phi Eta, University of Montana (Spring Semester).
Graduate Admissions Committee, University of Montana (February).
Third Committee Member for Sarah Attaway, M.A. (2024), Department of Psychology.
Second Committee Member for Emma Murdock, M.A. (2024), Department of Communication.
Second Committee Member for Mykel Greene, M.A. (2024), Department of Communication.
Second Committee Member for Alexa Runnion, M.A., Department of Communication.
Second Committee Member for Sylvie Coston, M.A., Department of Communication.

Service to the University

- 2025 WGSS Executive Committee, University of Montana.
Sustainable Campus Committee, University of Montana.
UMCUR Volunteer—Panel and Poster Session Evaluator, University of Montana
- 2024 WGSS Executive Committee, University of Montana.
Innovate HS Guest Lecturer (April 3), University of Montana.
Participant in Dr. Ratto Parks' Faculty Learning Community on AI in the Classroom,
MUS Scholars, FS2024
- 2023 Meteor Learning Course Design Program, Merrimack College. Designed & Taught COM
3742C: Community & Nonprofit Organizing, Course Development for SP2023
Mack-A-Thon Marketing Department Mentorship Event. Merrimack University
(April/May).
