

Mark,

Sorry we missed you on this trip. Wanted to drop this off and set up a time to meet on our next trip down this way.

Datum is all things technology for multi-unit restaurants, and we work directly with the C-Suite and Executive team.

From as simple as running POS support on all systems to fully managed services, our track record is that we save organizations more than half.

As I mentioned in my email, we did this for First Watch Restaurants last year, saving each corporate and franchise unit an average of \$11,200 in IT costs (\$1.4MM overall).

Would love to meet with you and Martin in person and talk some more. I will follow up with you shortly or can be reached directly at the contact information below.

Thank you,

Brandon Fluharty
