▲ Sum of Two Numbers

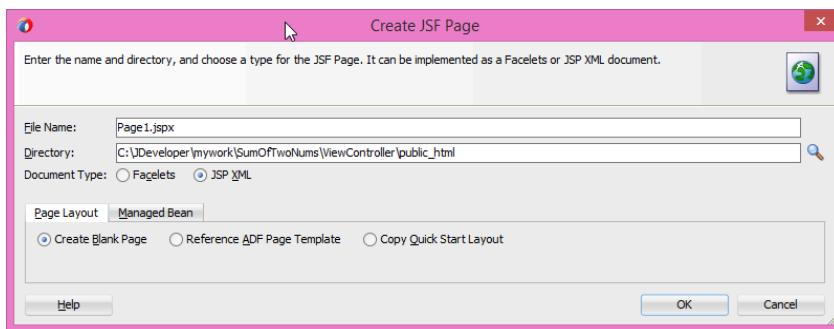

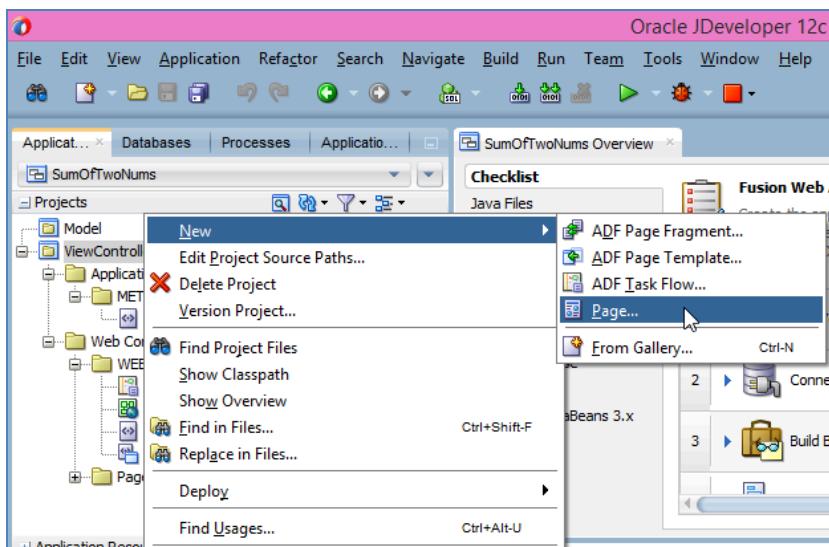

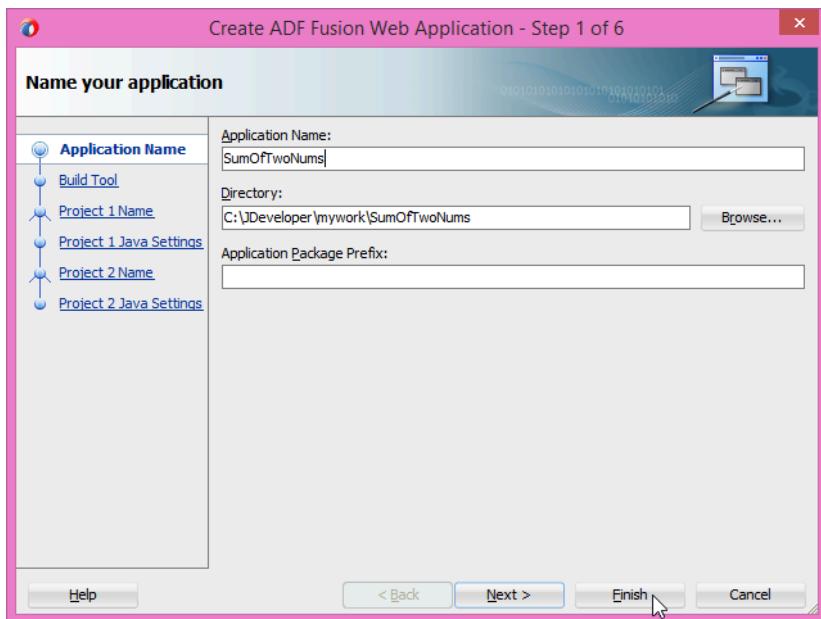

Value 1 :

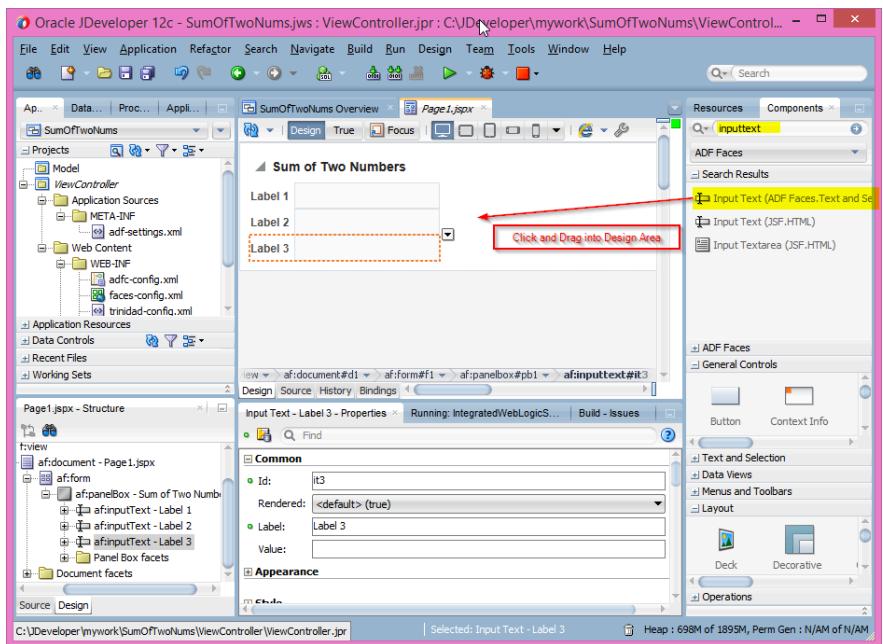

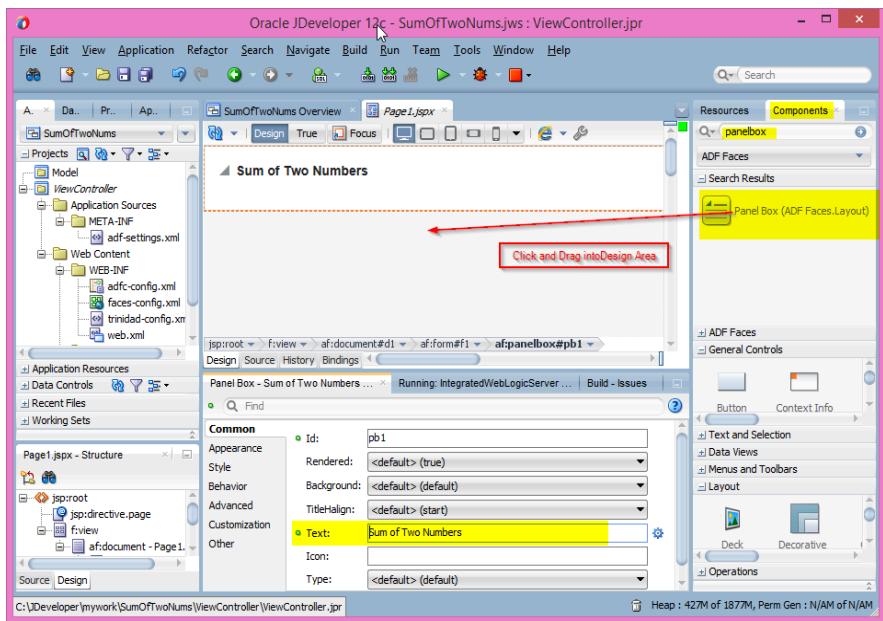

Value 2 :

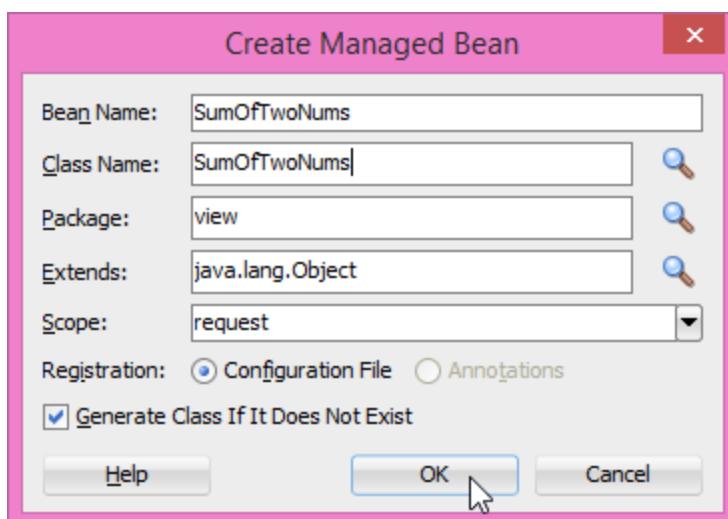

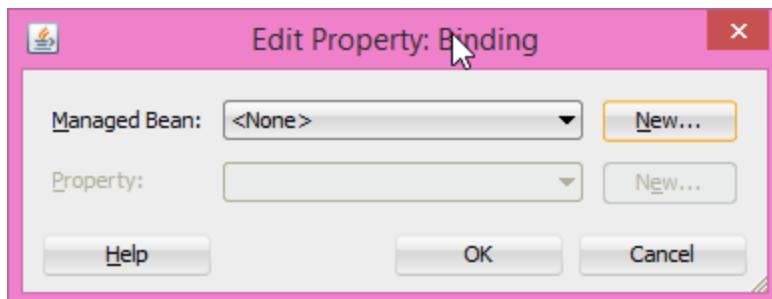

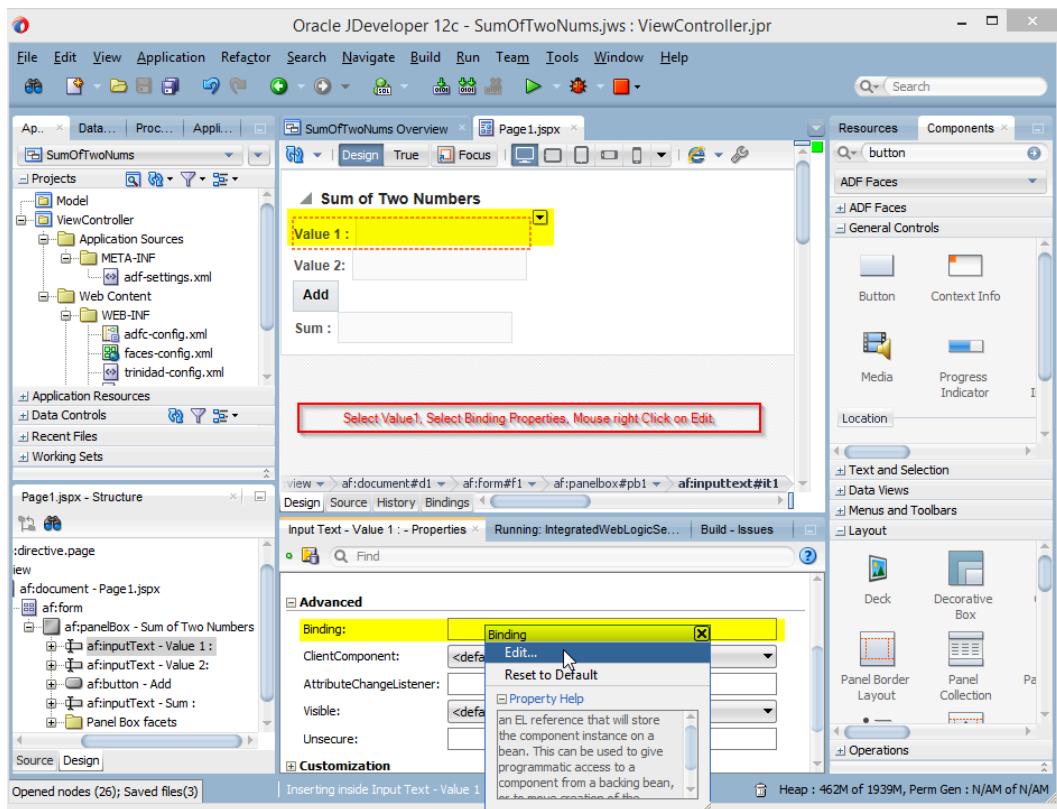

Add Clear

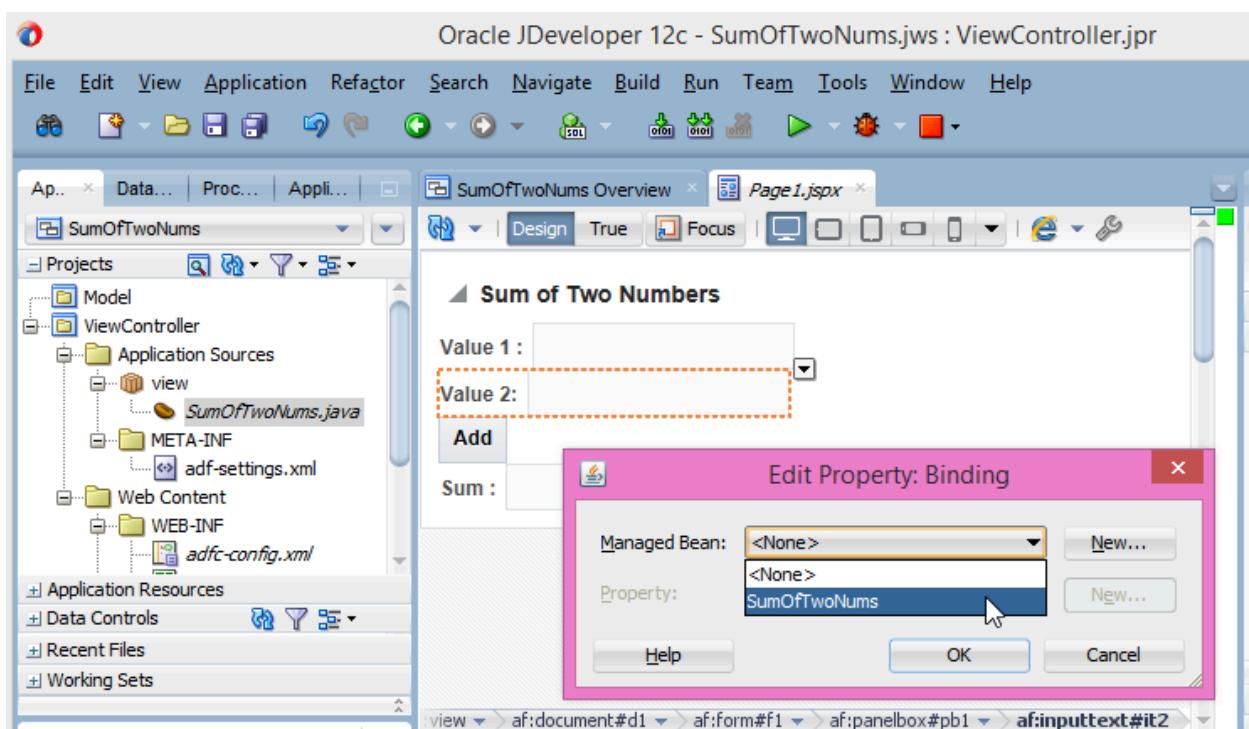

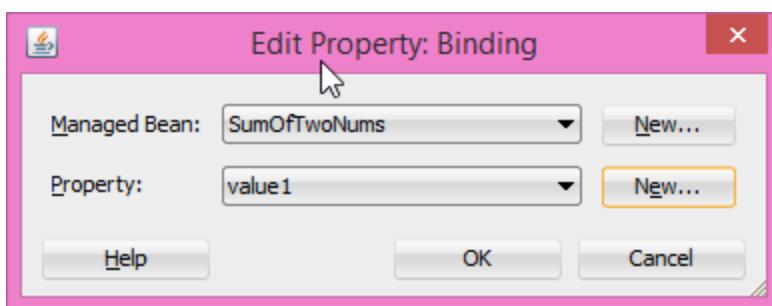

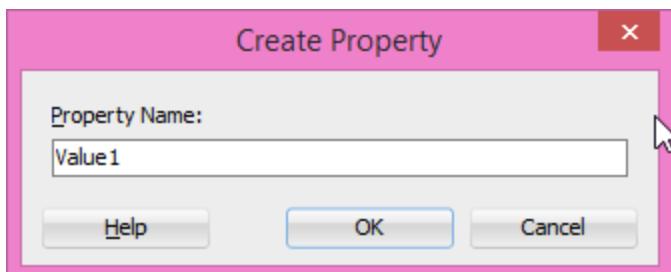

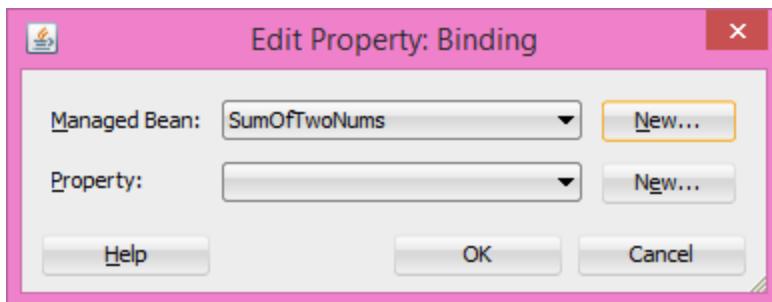

Sum :

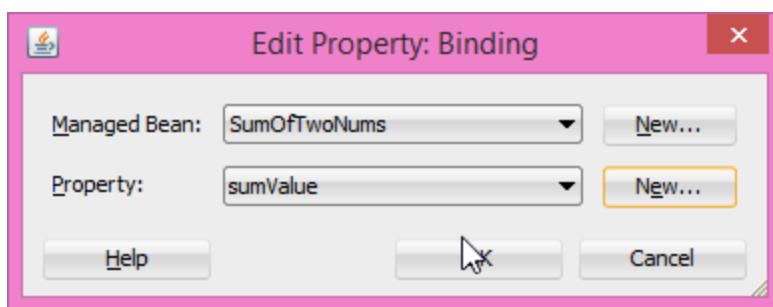

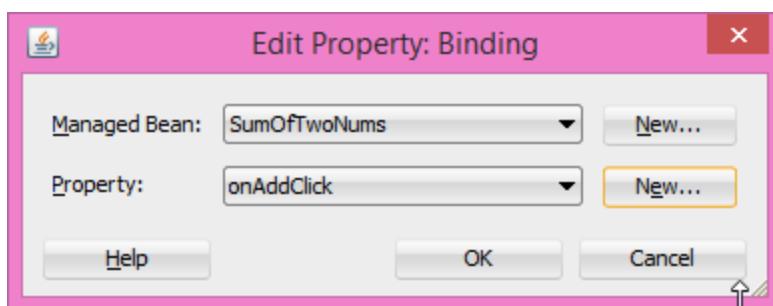

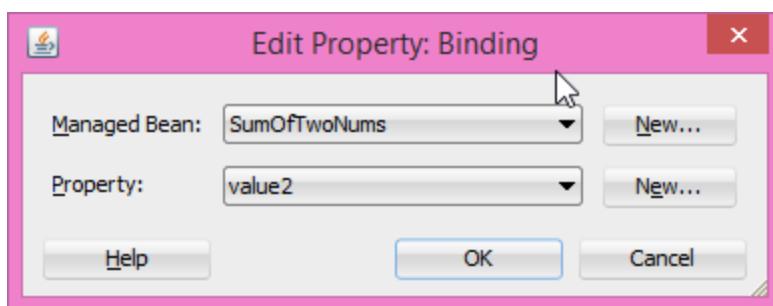

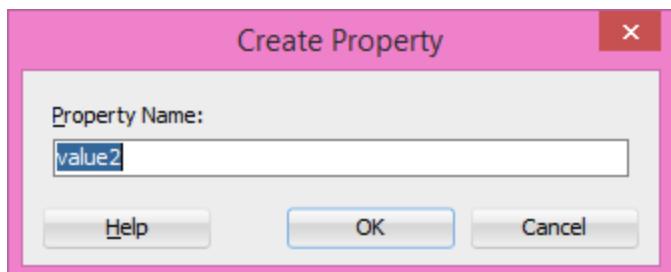

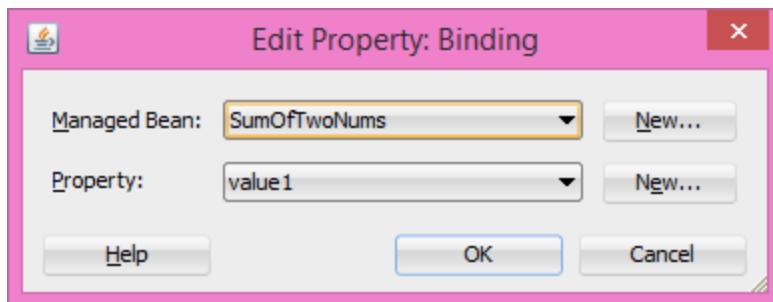

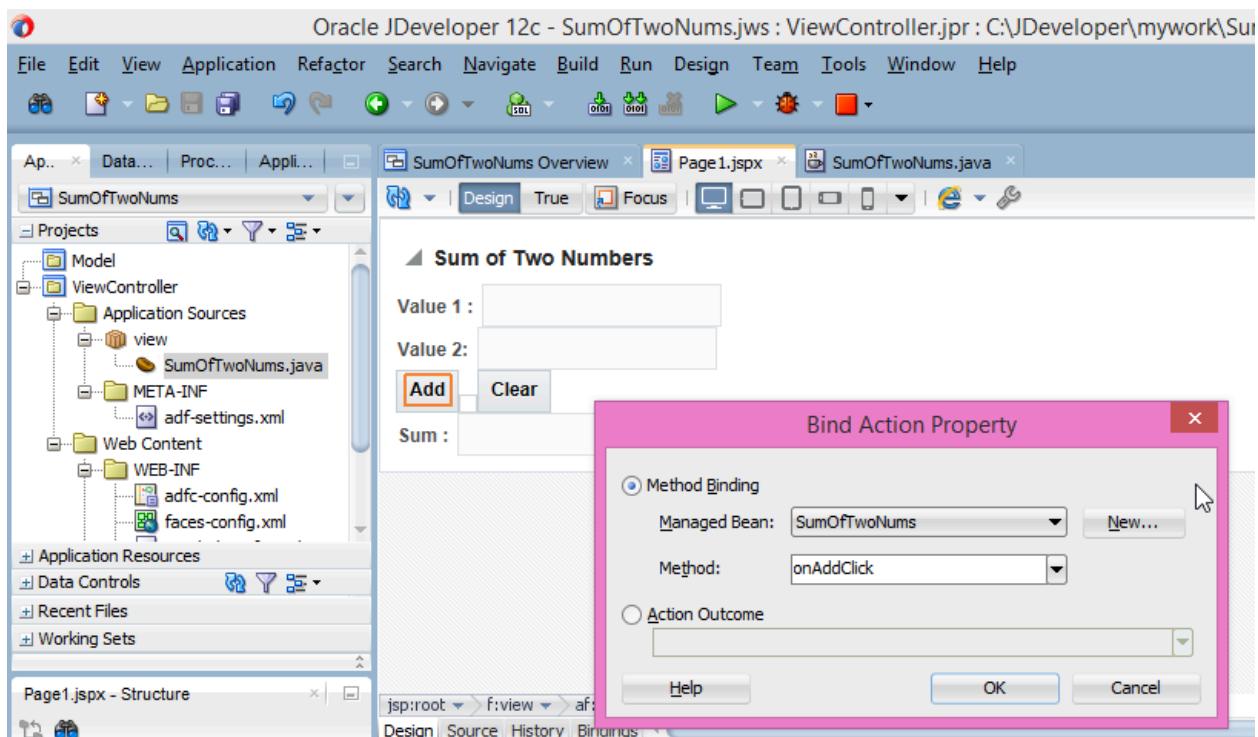

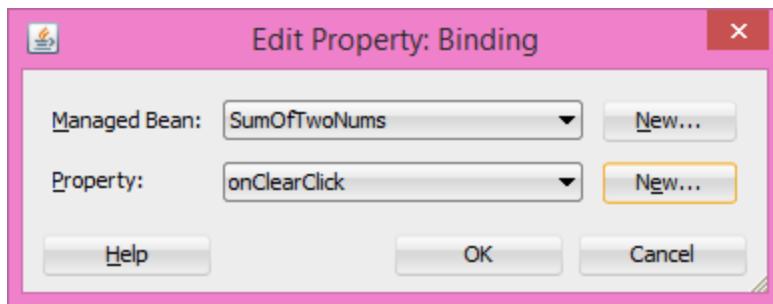

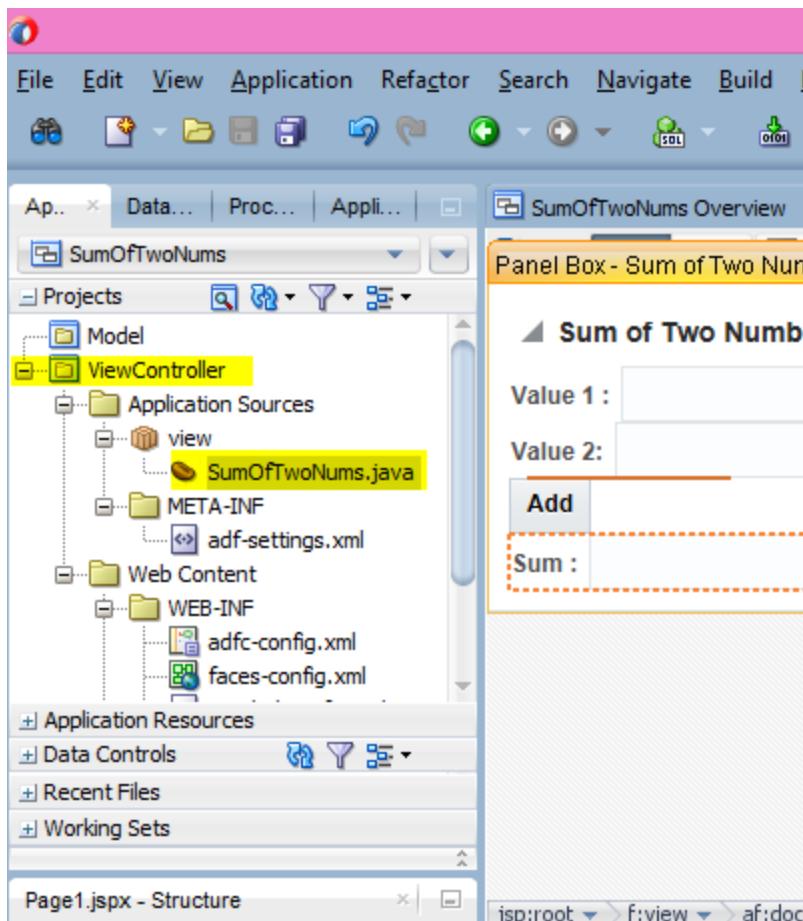

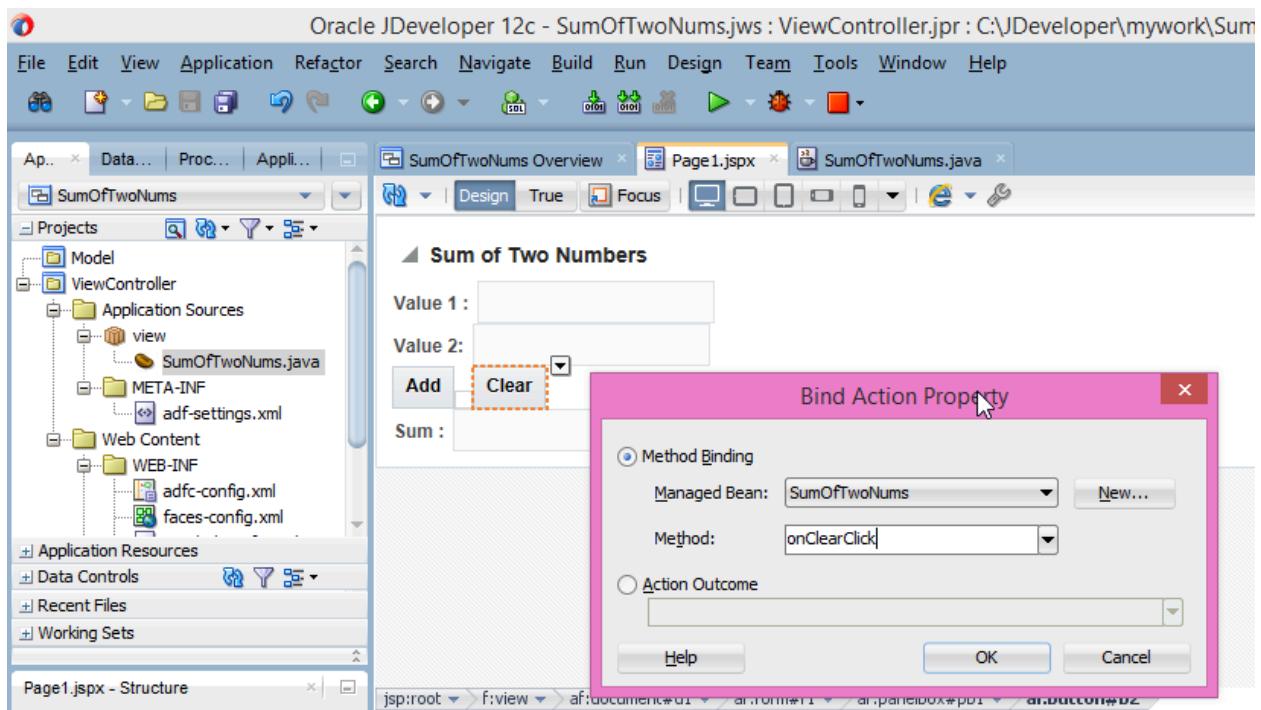

```
public String onAddClick() {
    System.out.println("**** Add Button Click ****");
    int tot=0;
    if (getValue1().getValue()!=null && getValue2().getValue()!=null) {
        int a= Integer.parseInt(getValue1().getValue().toString());
        int b= Integer.parseInt(getValue2().getValue().toString());
        tot=a+b;
        sumValue.setValue(tot);
        UIRefresh(sumValue);
    }
    return null;
}

public String onClearClick() {
    System.out.println("**** Clear Button Click ****");
    value1.resetValue();
    value2.resetValue();
    sumValue.resetValue();
    UIRefresh(value1);
    UIRefresh(value2);
    UIRefresh(sumValue);
    return null;
}

public void UIRefresh(UIComponent obj) {
    AdfFacesContext adfFacesContext = AdfFacesContext.getCurrentInstance();
    adfFacesContext.addPartialTarget(obj);
}
```
