LAYOUT ARTISTS:

Layout artists are similar to background artists. They draw the layout of a scene so the background artists know what to paint. Animators also use the layout background to properly place their characters where they should be.

ANIMATORS:

Animators provide the animation for the show. They go off the storyboards/animatics and work with the directors on their shots. When their shot is done, it will then be cleaned up

SPECIAL FX ARTISTS:

Special FX artists animate effects like fire, rain, lightning, and smoke for scenes.

Azielotl (@azielotl)
Raine (@raine2137)

COMPOSERS:

Composers create soundtracks to the show following a guide on music. They read the screenplay and come up with themes for certain moments or scenes.

Azielotl (@azielotl)
Alexandersaurus (alexandersaurus_dinosauria)
Lophi (@axesteel)
Cyano (@cyano8374)
Jello12451 (@jello12451)

SOUND DESIGNERS:

Sound designers (sound fx) create sounds outside of music for scenes. Things like roaring, growling, wind, rain, stomping, crashing, slicing, hitting, shattering, are all done by sound designers. Their work is put in during editing, but they are always busy.

Jello12451 (@jello12451)

COMPOSITERS:

Compositers merge all of the finished work for a shot into one thing, making it ready for public release. Then the editor strings all the compositer's finished shots together into an episode. This role requires Adobe After FX.

Alli (@alliiium)

EDITORS:

Editors string together all complete shots into an official Animated Wings of Fire episode! They also edit in credits and anything extra at the end of each episode. While there's no required software, I do prefer if a more advanced program is used.
