

JD For ASP Net Developer

Job Title: ASP.NET Developer

Company: [Company Name]

Location: [City, State]

Job Description:

We are seeking an experienced ASP.NET Developer to join our team. The successful candidate will be responsible for designing, developing, and maintaining web applications using the ASP.NET framework.

Key Responsibilities:

- Design and develop web applications using the ASP.NET framework
- Collaborate with cross-functional teams to define, design, and ship new features
- Write clean, maintainable, and efficient code
- Ensure the best possible performance, quality, and responsiveness of the applications
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency
- Work on bug fixing and improving application performance
- Participate in code reviews to ensure code quality and adherence to best practices
- Troubleshoot and debug application issues

Technical Competency Requirements:

- Strong knowledge of the ASP.NET framework and its core concepts
- Strong knowledge of C# programming language
- Strong knowledge of HTML, CSS, and JavaScript
- Strong knowledge of web development concepts such as RESTful APIs, AJAX, and JSON
- Strong knowledge of SQL Server and database design
- Strong knowledge of Git and version control
- Strong knowledge of web development tools such as Visual Studio and IIS

Behavioral Competency Requirements:

- Strong problem-solving skills
- Strong analytical and debugging skills
- Strong verbal and written communication skills
- Strong ability to work in a team environment
- Strong ability to learn and adapt to new technologies quickly
- Strong ability to prioritize and manage multiple tasks simultaneously

Qualifications:

- Bachelor's degree in Computer Science or a related field
- 3+ years of experience in web development using the ASP.NET framework
- Proven track record of developing and deploying web applications
