

Database Exploration

Instructions

1. Explore the assigned databases and websites to gather information about your global health issue/problem
2. Within each database, locate at least one report/article/statistic for your global health issue/problem
3. For each database, determine:
 - What kind of information did you find on your global health issue/problem?
 - Impact and prevalence
 - Preventability and migration strategies
 - Research opportunities
 - Socioeconomic factors
 - Political landscape, etc.
4. Copy and paste the permalink or citation to an article or source you found on your health issue
