

**Barrington Middle School
2019 - 2020 Master Schedule**

The BMS Learning Community is Respectful, Responsible, and Ready to Succeed!

Overview:

Earlier this year, the BMS Learning Community was charged to evolve their schedule. After a few messages (emails and AB) a committee was formed. Grounding our work with district and school non negotiables (see below), and after a few iterations, the scheduling committee created 3 possible schedules. In April, the 3 schedules were brought forth to our BMS Leadership Council (representatives from each cluster and department) for constructive feedback as well as their overall preference. From there, the scheduling committee considered their feedback and unanimously reached consensus on the below schedule.

Scheduling Non Negotiables:

School	District
Schedule that allows opportunities and time to support deep learning principles.	Schedule that allows math students to go to the high school.
Schedule that allows for time to allow for in class interventions and supports.	Schedule that allows to share resources amongst schools (BHS and BMS).
Schedule that supports social/emotional learning (ie. Advisory).	Increase world language opportunities and decrease health/pe to the required amount for our 6th grade students (postponed due to budget).
High expectation for All student solution.	Allow movement for students (PE) throughout the entire year (still working out details).
Common Planning Time for all.	Viable coding experience/rotation for all students.
	Consider our new building with programming.

Additional Considerations:

In addition to the above Non Negotiables, the Scheduling Committee also identified the following considerations:

- A schedule that works with the district's Homework Policy.
- A schedule that allows students to have math as close to 5 days a week as possible.
- A schedule that allows teachers to see students at different times of the day (will continue to work on in the fall). .
- A schedule that allows clusters the opportunity to have flexibility when/where appropriate.
