

How to use Subscript and Superscript in Schoology Assessments

in the text editor tools

STEP 1

Highlight the text you want to subscript or superscript.

STEP 2

Click the styles button which should be defaulted as Normal.

STEP 3

Scroll down to find both Subscript and Superscript.

Note: The question might show to the teacher in the list view of questions in any given assessment without the superscript or subscript, but when a student goes into the assessment to complete, the proper superscript or subscript shows. See below.
