**Back to work: (roughly 30 minutes)** The Lab

#### - **Game Information**

- Developed published by Valve
- Free on Windows via Steam VR

- **Gameplay and Notable Details** (Major features and bullet points. There is no need to explain every detail. This is an outline, not a list. Not every point needs to be addressed in a specific order. Hosts and guests can jump in with comments at any point. Our goal is to be conversational)

#### - **Shawn's notes:**

- Showcase for VR
- Less of a game and more a series of tech demos for the capabilities of VR
- Some are more experiences
  - Postcards: Experience several different real world environments in VR
    - Some have sticks you can throw for your robot "dog" to fetch
  - Solar System: A virtual representation of the solar system where the planets can be pick up, moved, and thrown
  - Secret Shop: Takes place inside the item shop from Dota 2 where players can interact with several items from the game
  - Human Medical Scan: Players can interact with a 3D human figure made up of many CT Scans
  - Robot Repair: Players attempt to repair Atlas from Portal 2 in this "interactive comedy sketch"
- There are a few actual games included as well
  - Slingshot: Fire cores into a warehouse and try to cause as much destruction as possible
  - Longbow: Try to stop waves of enemies from breaking down your castle gate
  - Xortex: 3D bullet hell
