

This document is to gather Ideas how WCAG could work better with COGA

Please add any ideas under the appropriate heading or make a new heading

Inclusive Culture

- **Help make sure people are heard**

Inclusive Process

- **Sc concencis takes into account votes who want something in, not just out**
- **Any consensus must be usable by everyone and understadable by everyone**
- Tools are more inclusive (2 Improve accessibility of WG tools, and/or develop better support for using tools.)
- 6 Establish **clearer** use of consensus process in determining which Success Criteria get into WCAG 2.1
- Making something like "communication rules "

User Focused Aims

-change the charter to focus on guidelines that cover the user needs , all barriers, and high level usability (**9###In future WCAG or AG versions, move towards "coverage" approach, rather than just grabbing low-hanging fruit approach**)

-

Better Structure

- Wcag structure allows for SC with less resistance for industry and testers. EG extention or Silver (see <https://docs.google.com/document/d/1WcfVALVq8PS9CLXUuAfV9Op0wXvI2yJYedj5jO23GTK/edit#heading=h.i3vodmrde825>)
- **Develop supplemental COGA guidance and ensure that it is easily discoverable from WCAG 2.1**
- **Reference to COGA supplemental guidance is not downgraded**

Honest reporting

1. y Ensure abstract / introduction does not overclaim coverage of cognitive and learning disabilities requirements in WCAG 2.1.
2. **Recording: not just consensus but reasons and by who with a chance for the task force to disagree in writing**

Misc

3. ?? With COGA TF, map which WCAG 2.1 SC relate to cognitive needs, but also which cognitive needs are covered in WCAG 2.1.
4. y Develop supplemental COGA guidance and ensure that it is discoverable from WCAG 2.1
5. y?
6. y? Document why COGA Success Criteria did not make it into WCAG 2.1 - **not just consensus but reasons and by who**
7. Review with AG WG what kinds of review criteria are appropriate for inclusion or exclusion of proposed COGA Success Criteria
8. y Provide training to WG leadership and participants on cognitive and learning disabilities
9. y
10. y Pursue complementary parts of improved coverage of cognitive and learning disabilities in other W3C WAI groups
