

[vmtool] How to install vmtool in your VM
Jing, mqjing@gmail.com

Install VMtools in CVM (Ubuntu)

Step 1: Mount the VMware Tools

Command:

[vsphere client] -> Virtual Machine

Step 2: Install VMware Tools

Command:

cvm terminal console

```
mount /dev/cdrom1 /mnt
gzip -dc /mnt/VMware...tar.gz | tar xzf -
umount /mnt/
cd vmware-tool-distrib
perl ./vmware-install.pl
```
