

CONSEQUENCE TABLE

MOVE 1

DECISION FRAME: (write in your question as you have framed it here)

MOVES 2, 3 and 4

	Option 1	Option 2	Option 3	Option 4	Option 5
Value 1	Note the consequence of option 1 on value 1 here	Note the consequence of option 2 on value 1 here	Note the consequence of option 3 on value 1 here	Note the consequence of option 4 on value 1 here	Note the consequence of option 5 on value 1 here
Value 2	Note the consequence of option 1 on value 2 here	Note the consequence of option 2 on value 2 here	Note the consequence of option 3 on value 2 here	Note the consequence of option 4 on value 2 here	Note the consequence of option 5 on value 2 here
Value 3	Carry on as above				
Value 4					
Value 5					
Value 6					

MOVE 5: After the table is filled in, make trade-offs by looking at all the consequences holistically as they align with the options and make judgements around which option is best. Then, decide.

MOVE 6: Stay curious about the decision! As new information emerges, you may want to revisit it.
