
HOW TO USE – GHOSTBOT

Overview

GhostBot is a fully automated cryptocurrency trading system designed to make passive income accessible even for users with **zero trading experience**.

The system is powered by:

- algorithmic trading strategies
- real-time market analysis
- strict multi-layer risk management
- automated liquidity distribution

GhostBot operates completely autonomously:

- analyzes 9,000+ market patterns per second
- executes trades every 30–80 minutes
- adapts to market volatility
- manages liquidity without human intervention

Your role is simple:

deposit → reinvest → withdraw when you want

GhostBot never takes custody of user funds and has **no manual access** to client balances.

1. Access & Account Creation

Getting started takes seconds.

- Open GhostBot using the official Telegram link
- Once you enter the bot, your account is created **automatically**
- Your account is securely linked to your **Telegram profile**

There are:

- no passwords
- no registration forms
- no manual verification

As long as you have access to your Telegram account, you have full access to GhostBot. This ensures simplicity and maximum security.

2. Main Interface & Bot Control

All bot management happens on the **main screen**.

Bot Activation

In the **top-left corner**, you can:

- activate the bot
- deactivate the bot at any time

Once the bot is **active**, it starts trading **automatically**.

There is:

- no setup
- no strategy configuration
- no manual trading

Everything runs fully automated.

3. Income Plans (Core Logic)

GhostBot operates using **12 Income Plans**.

Each income plan includes:

- a specific **deposit range**
- a **fixed daily profitability percentage**

Example:

- An income plan may offer **1% per day**
- As long as your balance remains within that plan's range, you earn **1% daily**

Automatic Plan Adjustment

Income plans change **automatically**:

- if your balance grows → you move to a higher plan → higher daily percentage
- if your balance decreases → you move to a lower plan → lower daily percentage

No manual switching is required.

The system always applies the correct plan based on your **current active trading balance**.

4. Fixed & Stable Daily Profitability

- Each income plan has a **stable and fixed daily percentage**
- Profit is calculated from the balance that the bot actively trades
- As long as you stay within the plan's limits, the percentage does not change

This provides predictability and transparency.

5. Trading & Profit Generation

GhostBot trades fully automatically.

- Average trade duration: **30–60 minutes**
- Profit is credited **immediately after each trade**

At the bottom of the interface, you can:

- view completed trades
- track trade history
- see confirmations and screenshots of executed trades

This ensures full transparency of bot activity.

6. Reinvesting Strategy (Very Important)

You have full control over reinvestment.

You can reinvest profits by pressing the **Reinvest** button:

- once per day (simple mode)
- or after **every single trade** (maximum compounding)

There are **no limits** on reinvests.

Reinvesting:

- increases your active trading balance
- accelerates compounding
- helps you move into higher income plans faster

Top users reinvest **10–20 times per day**.

7. Deposits

How to deposit:

1. Enter GhostBot
2. Tap **Deposit**
3. Choose:
 - coin (USDT, USDC, ETH, BTC, etc.)
 - network (TRC20, ERC20, BEP20, etc.)
4. The bot generates a **unique one-time address**
5. Send the exact amount
6. Funds are credited automatically after confirmation

Typical confirmation time:

- USDT TRC20 — 5–30 seconds
- USDT BEP20 — ~1 minute
- ETH / BTC — 3–10 minutes (network dependent)

Each deposit uses a **new address** for maximum security.

8. Withdrawals

Withdrawals work similarly to crypto exchanges.

How to withdraw:

1. Tap **Withdraw**
2. Choose coin and network
3. Enter your personal wallet address
4. Confirm the request

Processing time:

- 1–3 minutes on average
- blockchain fee applies (\$1–\$3)

There are:

- **no platform fees**
- **no withdrawal limits**
- **no manual approvals**

9. Withdrawal Cycle (5-Day Rule)

To protect liquidity pools:

- you can withdraw **100% of your balance once every 5 days**
- you can withdraw **smaller amounts anytime**

This rule prevents liquidity abuse and ensures system stability.

10. Referral System (Earn Without Investment)

You can earn even **without depositing**.

Open the **Referral System** tab:

- get your referral link
- read the rules
- invite friends

You earn a **percentage of your referrals' profits**:

- passive
- stable
- automated

Referral rewards are credited and withdrawn the same way as trading profits.

11. No Limits & Full Automation

GhostBot has **no limits** on:

- deposits
- withdrawals
- number of transactions

Everything is processed automatically.
No human intervention is ever applied.

All funds visible on your balance are **fully yours**.

12. How We Earn & Why Your Funds Are Safe

GhostBot uses a **liquidity distribution system**.

Profit Distribution Example (\$100,000 profit):

50% — Client Profit Pool (\$50,000)

Used to pay all client profits from the trade.

Includes a built-in safety buffer.

25% — Reserve Pool (\$25,000)

- Automated smart-contract logic
- No manual access
- Over **\$12,000,000** in reserves
- Funds do not participate in trading

This pool exists purely for extreme protection scenarios.

25% — Team & Infrastructure (\$25,000)

Used for:

- team compensation
 - development
 - infrastructure
 - security upgrades
-

13. No Hidden Fees

GhostBot does not charge:

- trading fees
- management fees
- performance fees

Everything credited to your balance is **net profit**.

You can withdraw it freely at any time.

14. Security

GhostBot uses a **triple-liquidity system**:

- 50% — main liquidity pool
- 25% — operational trading pool

- 25% — withdrawal pool

The bot:

- cannot manually access funds
- cannot move balances between pools
- never touches private wallets

The system has:

- 7+ years of internal operation
 - 2+ years public
 - zero downtime
-

15. FAQ (Short)

Is reinvesting mandatory?

No, but it significantly increases results.

Can I withdraw to a bank?

Withdrawals go to crypto wallets. Fiat conversion is up to you.

Do you take profit share from users?

No. Only blockchain fees apply.

Do I need a subscription?

Deposit \$100+ → Lifetime Access.

Can I deposit multiple times?

Yes. Each deposit increases your active balance.
