SHEN ITEM SETS

Introduction

Due to the lack of resources we've had in the server for newer shen mains, we've decided to create some importable item sets for more inexperienced players who have trouble finding and sticking to the most optimized builds.

This information will be kept up to date with the current meta and is largely influenced by the items the challenger Shen main xPetu has listed in his comprehensive guide, which will be linked below. If you have any specific questions, feel free to ask in the [#discusshen](#) channel of the discord.

Please message us on discord if you encounter any problems.

Last checked/updated: Patch 11.10

xPetu's Comprehensive Shen Guide:

Tutorial

1. Copy one of the strings below that you want to import into your client
2. Open your league client and go to you **Collections** tab

3. Click on the **Items** section and select **Import Item Set - Paste Copied Set**, paste the string and hit save.
