

Create an Account

Contact your school's WeVideo admin to make sure you are set up with your WeVideo account

If your school doesn't have an account yet, start your [teacher trial here](#)

"Get Started"

Create a new project  
Give it a title/description  
Click "Finish" to get to the editing studio

[Help?](#)

Recording

Make a short recording of your screen explaining how to get to a website  
  
\* You can import videos from Drive too!\*

[Help?](#)

Clip Timeline

Place recording into the video timeline section on the bottom of the window  
  
How?  
*Drag the media from the top section to the row on the bottom.*

Add Audio

Add "free music" from the audio folder  
  
Try out a sound effect  
  
Click the mic icon to record a voice-over.

Get familiar with WeVideo!

Explore this game-board to learn about WeVideo for recording/editing videos!

Guidelines

- 1. Complete the boxes in the top row first, and then you can do the rest in any order you want.
- 2. You will find a short clip with directions in the bottom of each box to help walk you through the steps if needed.
- 3. Use the "fill" tool or color in each box as you complete it! [\(How-to fill the box\)](#)
- 4. Download the WeVideo free app if you'd like to edit your projects on your phone!

Motion Titles/Text

Look at the motion titles and try a few out  
  
Now look through static titles. (Text doesn't move)  
  
Add an annotation (Arrow or shape)  
  
\*You can delete the ones not needed\*

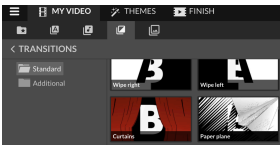

[Help?](#)

Change Theme

Pick a few themes and see what they do to your video!  
  
Think about if this may be something you'd include in your next project

[Help?](#)

Transitions

Enter a standard transition at the start of the video  
  
Try out a few and keep your favorite  
  
Now add a transition at the end of your video

[Help?](#)

Graphics/Backgrounds

Select a background from folder  
  
Delete the background and insert an overlay to see

[Help?](#)

Advanced Adjustments

Double-click on your clip and change the scale from "1"  
  
Look at other options that are available

[Help?](#)

Change Speed/Fade

Double-click your video and change the volume level of your clip  
  
Go to the speed tab & increase the value
