

Hello E2 Parents,

It was great to talk to you at parent-teacher conferences! We treasure the insight you give us in learning more about your child! Thank you!

Quarter 1 has ended for the district. We've had a very busy fall. Here is a snapshot of what's been happening in E2:

**Field trips:** The zoo trip was wonderful! The students were great! Tomorrow, Thursday, November 6, we will go to the PAC for a Soweto Gospel Choir performance. We are looking forward to a great show.

**Coffee Service:** The 6<sup>th</sup> graders are so excited to have started coffee service. What started from a student's idea years ago, has bloomed into a joyful, kind example of service leadership that our 6<sup>th</sup> graders experience. Students are responsible for all aspects of scheduling, making coffee, taking orders, delivery and clean-up. It's always a treat!

**Year Long Project:** All students have started their YLP proposal outline. This year we moved to using Google Classroom, instead of Canvas. So far, it's been a good transition. There are a few kinks yet to work out, so thanks in advance for your patience!

Please have your child show you around our Google Classroom site. You will find informational documents, assignments and due dates.

**To access google drive at home, follow these steps:**

- go to AASD's website
- choose Families pull-down menu
- choose Classlink
- when prompted for an email address, use this  
**your child's username@stu.aasd.k12.wi.us**
- use the child's password (this is the same one they use to log into their Chromebooks)
- click on the Google Classroom icon

If you cannot find the Google Classroom icon on their Classlink page, here's an alternate way to get there:

- click on the google drive app icon
- your child's drive should pop up
- from the 9 dot waffle menu on the top right, you will see the google classroom app icon

**Science:** We have finished our biomes lessons and have begun a new Mystery Science unit called Web of Life. All of the lessons relate to our year long project work, and include food chains, producers, consumers, decomposers, and ecosystems.

**Math:** Students are now into their individual geometry work packets. In this area of study, we'll be working on lines, angles, triangles, quadrilaterals and circles.

**Language:** We've been studying the sentence and analyzing subject, predicate, compound subjects and verbs and modifiers.

**Gear:** Please remember to send your child with appropriate gear for the weather. It's going to get cold in the next few weeks!

Thank you for your support and have a great week!

Mr. Lederer and Mrs. Strand
