

SL: How to expand your email list NOW

Hello, Picasso tattoo studio.

Recently when I was looking for tattoo studios in New York City I came across your website, and I gotta say, compared to other studios It is impressive.

Examples of tattoos, a simple booking form with a one-time discount, testimonials of previous clients, an FAQ explaining all the common questions customers might ask, and even the possibility to sign up for the email list.

I know a few secrets on how to improve other things than your website like for example your email list.

Right now you probably know how impactful the email list can be, then why not mention it on social media posts to get more and more people to sign up for it?

It's a simple way to improve your sales, and the best part is, that it's completely free of any risks.

And as an online marketer, I can help you create an "Opt-in page" that will gather more and more emails on the list that you can talk to, into then convincing them into coming to get a tattoo.

When you decide that you're interested, we can schedule a quick Zoom call to talk about the details.

Ps. As a free gift in the attachments, I've linked an Opt-in page that I made for another business.
