has attended the workshop

RNA-seq for beginners: from sequences to visualization using Galaxy and R

in \<city\>, \<country\>, \<month\> \<days\>, \<year\>

The workshop included a theoretical introduction and hands-on parts (workload in hours)

- Introduction to Galaxy: GUI, data upload, tools, visualization (5h)
- Sequencing data analysis: file formats, Quality Control, Mapping (3h)
- RNA-Seq analysis: quality control, mapping, transcriptome assembly, differential gene expression analysis, visualization (7h)
- Basics of R programming (3h)
- Post-processing of RNA-seq data using R and Rstudio (4h)
