

Here it is! Your 2025 summer assignment! You will...

- Completely read and thoroughly outline (must be hand-written) 3.2.1-3.2.7 (Intro to Organic Chemistry) AND 3.4.1-3.4.5 (SL overview of Organic mechanisms)
- Separately, do all practice problems* throughout the chapters. (And again, if this is a multiple choice question you must explain WHY the correct answer is correct.)
- Do all red problems* at chapter end.
- Do the assignment problems from [this pdf](#).

**You already have the answers for these. I expect great things, not a crummy copy job.*
