

CharChar

CharChar is a blue and white serval that is one of my two fursonas. I don't play as him often because I am not happy with his design in feralheart, maybe I will get

a preset of him in the future. CharChar is friendly, talkative and smart. You can see him sitting with others and talking very often. I rarely roleplay as CharChar, he is mostly just a character to mess around on.

Error!Sans

Error is not created by me. He is a fan made Undertale character by LoverOfPiggies and he is in the comic series called 'Ask Error' and 'Christmas Party Aus' which are both made by LoverOfPiggies. The

Error I roleplay as is not the exact same as the cannon Error in the comics so do not take this information as fact. You will most likely see me on this character. I roleplay as Error as well as just hang out on the character. I tend to alternate from in character, out of character and kinda in character. There are a few other people that roleplay as Sans Aus like Underfell (edge) Sans, Ink Sans and Underswap (Blueberry) Sans. I am usually hanging out with them.

Error is not a nice guy. He is rude, combative and unsociable. Not to mention a murderer, piss him off and he won't hesitate to attack and kill you. He gets along with Blueberry. He often just calls him 'Blue'. He likes to tease Edge and piss him off but he doesn't hate him. He really hates Ink though. If you see me just sitting happily with Ink I am not in character at the moment. Error is the 'master of the trees' and has claimed them all to be his. He will even call himself 'Tree!Sans' at times. Don't go onto the tree he is on, because he will hate you forever. Error has haphephobia, which is the fear of being touched. He will often yell out 'DON'T TOUCH ME!' or 'HELP! HE'S TOUCHING MEHHHH!' The exception to this is if someone else states they don't want people touching them, then he will go right up to them and touch them, just to anger them.

Huh

I am sure you have at least heard of the new species in feralheart called the 'huh'.

I decided to join in and create my own. My huh has the typical bright orange and pink coloring. She has light blue markings. She has ocelot markings on her face which is not typical. Unlike other huhs, she has a bright teal tail tip which has given her the nickname 'Tealtail' or 'Tealchild'. Her tail leaves a light behind it that slowly fades over time. She uses it to create temporary art. She is an artist,

though she isn't very good at it yet. She draws whenever she can and is happy with her drawings even if they aren't as good as others.
