

MUST DO:

BEFORE READING ON: Throughout the setup process make sure you are following this table, these are all the possible things that can make AFK Bot not work for you. Many of these won't apply to you but still worth reading and checking to make sure you have a flawless experience.

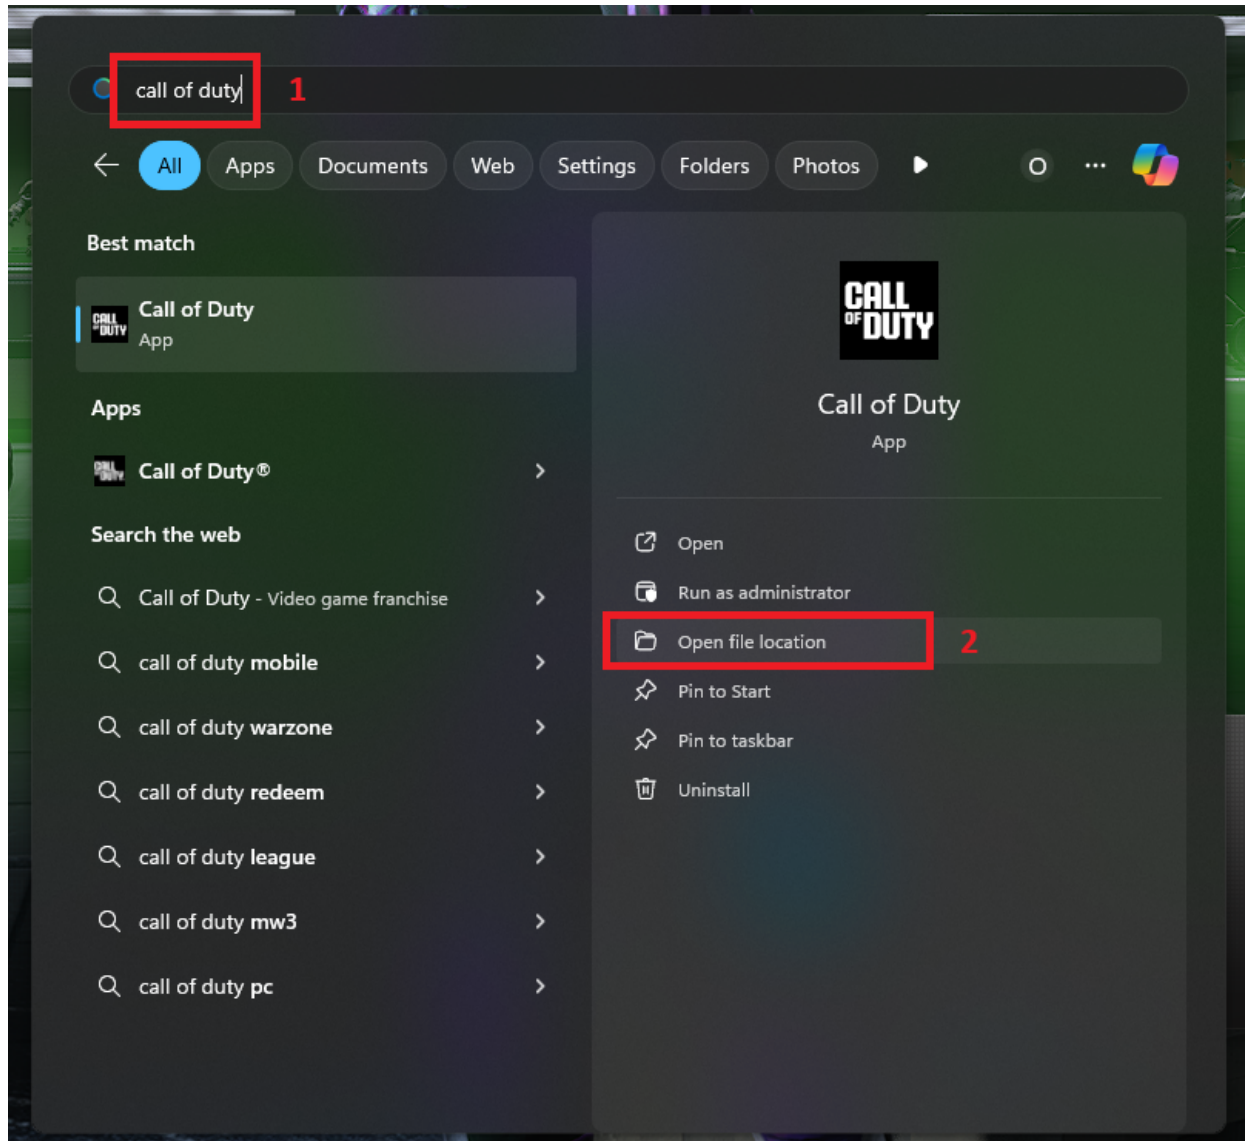

☐ Shader Quality	 Make sure shader quality is set to Medium or higher.
☐ Run AFK Bot as Admin	RUN AFK BOT AS ADMIN!
☐ System Requirements	Ensure your device meets COD's required specifications to avoid any issues.
☐ Desktop Screen Text	Make sure your text size on 100%
☐ Game Screen Text	MAKE SURE ITS ON DEFAULT, WHO EVEN USES ANYTHING ELSE
☐ Monitor Setup	If you have multiple monitors, run AFK Bot on your main monitor.
☐ Operating System	Windows Only.
☐ User Agreements	if using a new account, complete all user agreements in advance within COD.
☐ Set BACKPACK keybind to TAB	If AFK Bot does everything fine but then doesn't do anything in-game, remember to check in-game not pre-game as we dont activate AFKing in pre-game. Make sure that your BACKPACK is set to TAB keybind.
☐ Windowed Mode	Alt+Enter to make COD go into "Windowed mode" MUST BE IN WINDOWED MODE
☐ Parachute Settings	Set parachute deployment to "Free Fall" to gain more XP.
☐ Input Settings	Make sure your input settings are set to "Keyboard & Mouse".

☐ Perks	Use the "Payout" perk for additional XP, for extra XP in All gamemodes..
☐ Loadout Naming	Make sure you have a loadout named "MY LOADOUT 1", ON MULTIPLAYER If you have auto loadout switching ON then please make sure to have 5 loadouts named "MY LOADOUT 1" up to 5. Make sure you have loadout name "CUSTOM LOADOUT 1" ON WARZONE
☐ Graphic Settings	For lower-end machines, reduce graphics settings to the minimum as you don't need high graphics while not actively playing.
☐ Overlays	Disable any overlays that may make your screen super bright or gritty
☐ Game & PC Language	Make sure game & PC language is set to English, if we have a large customer base for example in france, we will add french language but for now English only
☐ Stay Under 4K Resolution	Please use anything below 4K Resolution as 4K makes everything smaller so may cause issues.
☐ Aspect Ratio	Search for the ASPECT RATIO setting in COD and set to AUTOMATIC
☐ Bnet Closed	Make sure to have bnet closed when trying to run the bot on steam otherwise it will try to start from bnet as well and fail.

Running AFK Bot:

How to find your COD PATH? [METHOD 1]

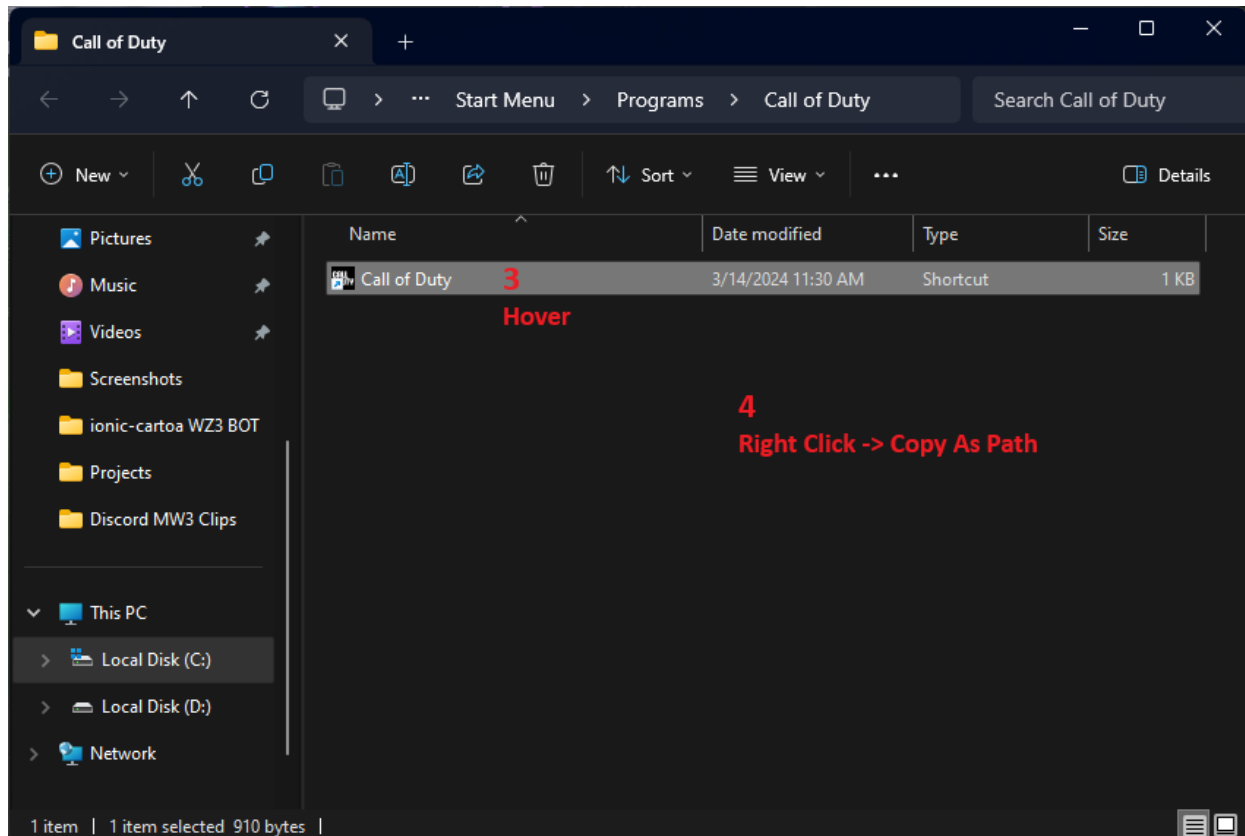

1. Click your windows key and type call of duty
2. Click on "Open file location"

3. Hover above the cod shortcut

4. Right click and click on "Copy As Path"

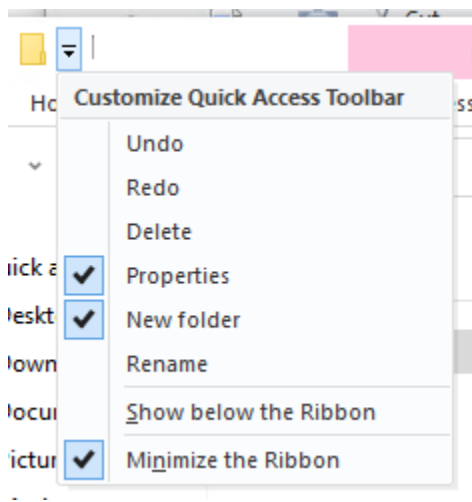

IMPORTANT: Make sure to check its the correct path by clicking "Open file location" again on the exe to make sure it's in the steam folder and not bnet in case you have both installed.

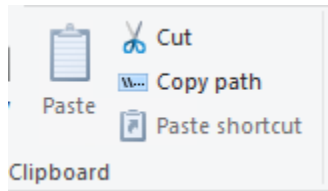

5. When you paste it, there will be double quotation marks, make sure to remove them & save it somewhere you can easily access for next time

WINDOWS 10: If you dont have the “Copy As Path” button it will probably be in the top header bit where the scissors icon is and the bin.

If you dont see the menu bar, click the small down arrow and uncheck “Minimize the Ribbon”.

Then you will see the menu bar show up and be able to see the “copy path” button.

How to find your COD PATH? [METHOD 2]

This works for gamepass and steam:

1. Go to steam or gamepass
2. Create a desktop shortcut in the game settings usually under “manage” settings
3. Create the shortcut, return to your desktop
4. Right click the shortcut and copy as path and if you are windows 10 you can copy it in “Properties” or in file location

How to stop the bot/receive your analytic report?

NEW V10+ VERSION:

If bot is in action you may have to spam “L” till it stops or wait till its not in action and it will stop with 1 “L” press or a few.

How to run AFK Bot?

1. Download AFK Bot from the link given to you in discord
2. Open up the folder you will see the AFK Bot program and a runopts.yaml file
3. Firstly open up the “runopts.yaml” file
4. Edit the file to save your setting, to do so for example [launcher = ‘steam’] would set your preferred launcher to steam, keep filling out the options up to your key
5. Save the runopts files and return to AFK Bot program
6. Now you can press ‘y’ in AFK Bot to run from runopts file and should instant launch for you
7. You may run AFK Bot from the desktop or anywhere in the game, you start and stop it as you please it will just resume from where it is.

NOTE: Make sure to edit the options to match your needs e.g. gamemode, launcher and accesskey.

AFK Bot Options:

- **ENTER LAUNCHER**
 - steam
 - battlenet (not yet fully supported use steam for now)
- **ENTER CODPATH**
- **ENTER GAMEMODE**
 - warzone_plunder_quads
 - warzone_ranked_resurgence
 - warzone_br_trios
 - warzone_br_duos
 - warzone_br_solos
 - warzone_resurgence_quads
 - warzone_resurgence_trios
 - warzone_resurgence_duos
 - warzone_resurgence_solos
 - warzone_featured_purgatory
- **LOADOUT SWITCHING**
 - on
 - off
- **ENTER STOP_IN**
 - Leave blank to run program indefinitely.
 - Give number for number of minutes to run bot for e.g. 200 (for 200 minutes)
- **ENTER STOP_BEHAVIOUR**
 - options: [**bot_stop** (default), **pc_sleep**, **pc_turn_off**]
stop_behavior is only asked if you specified a **stop_in** time
- **ENTER ACCESS KEY**

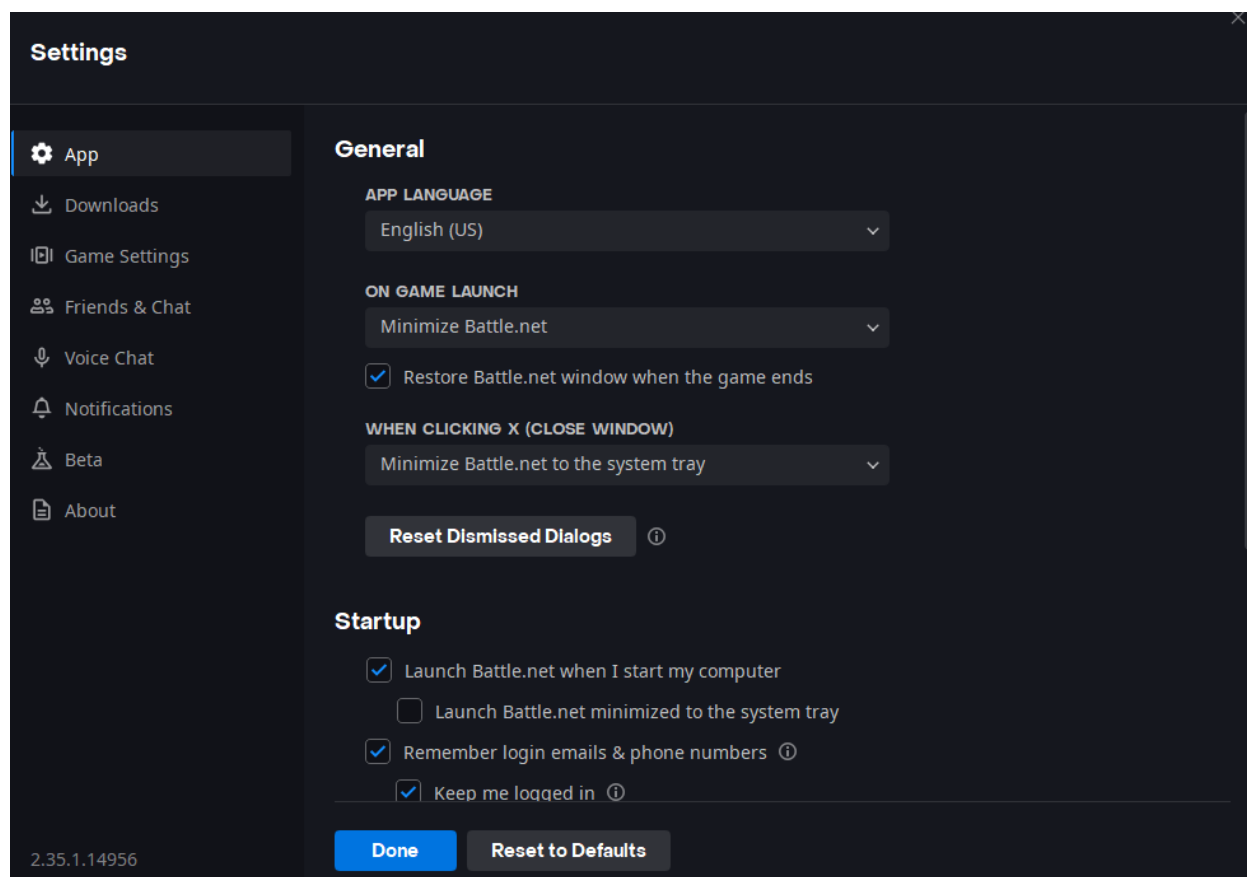

Battlenet Guide:

- To have a smooth experience with battle net, you **MUST** have the play window open and no overlapping windows, so that in case of a crash or restart the bot is able to recognise the battlenet window & press play button and not get blocked.

Set BNET close upon game launch(DO THIS FIRST):

1. Click the BNET logo in the top left with the drop-down menu and select 'settings'.
2. You will then be on the 'App' section, on the right you will see 'ON GAME LAUNCH'
3. Set it to 'Minimize Battle.net' & make sure box below it is ticked

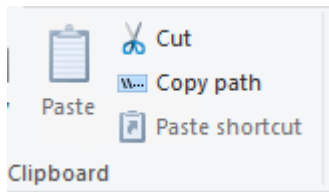

1. After setting up BNET close upon launch
2. Go back to COD "Play" button window
3. From this window you may start AFK Bot

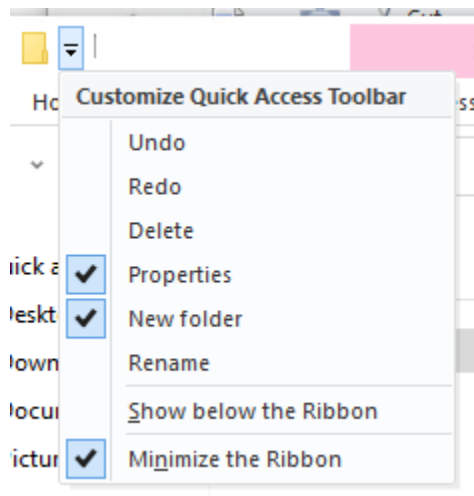

Gamepass COD Path:

1. Go to COD in Xbox App
2. Click "Manage"
3. You should then see "CREATE DESKTOP SHORTCUT"

4. Create one and return to your desktop
5. Right click the shortcut and copy as path
 - 5a. If you are windows 10, go to your file explorer -> go to desktop -> click the shortcut and then you can copy as path on the taskbar, which will look like this:

If you don't see a task bar then, click the small down arrow and uncheck "Minimize the Ribbon":

BO6 MP GUIDE:

- Anyone that has AutoPlay not clicking in game error pop-ups please try changing your **IN-GAME** resolution to 1920x1080 and see if it now clicks them. It's supposed to work on all resolutions but to make sure it 100% works it seems that 1920x1080 always works compared to other resolutions. Your PC can be any resolution below 4k.
