

Template of International Journal of Science and Society (14 pt)

First Author^{1*}, Second Author² (11 pt)

¹First Author Affiliation, Country, e-mail (10 pt)

²Second Author Affiliation, Country, e-mail (10 pt)

*Corresponding author, e-mail: ijss@marasofpublishing.co.id (10 pt)

Abstract— Abstract example. The abstract is written in English. Use 11 pt Aptos Narrow, 0.5cm left and right indentation. The maximum length is 200 words, and make sure the grammars are correct. Please use a spelling checker in order to ensure the correct spelling. The abstract cannot contain equations, figures, tables, or references.

Keywords: Keyword_1, Keyword_2, and Keyword_3.

This article is licensed under the [CC-BY-SA](#) license.

1. Introduction

The title of each section is written in 11pt Aptos Narrow. Introductions consist of the background or problem and the significance of the research. It also should clearly state the purpose of the research, gap analysis, and hypothesis (if any). When describing gap analysis, please provide references for other related previous works and clearly state the position of the research to other literature.

2. Method

All figures and tables should be centered and numbered consecutively. Use the “Figure. 1,” to cite the figure in the text and Table. 1 to cite the table in the text. Such as the power system components can be divided into five primary levels or subsystems, as shown in Figure 1.

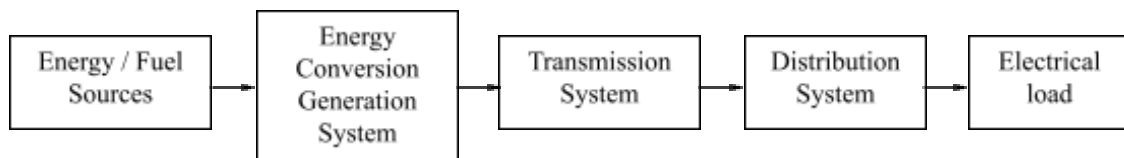

Figure 1. Power System Components

Table 1. Example on How to Present Your Second Table

Column Title	Column A (t)	Column B (t)
First row	1	2
Second row	3	4
Next row	5	6

Number equations consecutively with equation numbers in parentheses flush with the right margin (1). Be sure that the symbols in your equation have been defined before the equation appears or immediately following.

$$z = 10 x^2 - 5 \quad (1)$$

2.1 Second-Order Heading

This section contains the methodology or theory used to solve problems from articles published in Marasofi International Journal of Civil Engineering. The section addresses connections between findings and basic concepts or hypotheses made earlier. Authors should also express whether any arguments were needed relating to other works from other researchers. Write implications caused by the work related to theoretical or applications. Write results in a logical sequence.

3. Result and Discussion

This section contains the results and discussion of articles published in the Marasofi International Journal of Civil Engineering. The conclusion should be linked to the title and objectives of the study. Do not make statements not adequately supported by your findings. Do not use bulleted points; use paragraphed sentences instead

4. Conclusion

This section contains conclusions from articles published in the Marasofi International Journal of Civil Engineering. Papers accepted for publication are strictly limited to 5-12 pages in a one-column format following this template.

Acknowledgment

Financial support should be stated in acknowledgment. For example, This work was supported in part by the Indonesian Department of XXX under Grant BS123

References

References are essential to the reader; therefore, each citation must be complete and accurate. Authors are required to use citation management software such as EndNote or Mendeley. List only one reference per reference number. If a reference is available from multiple sources, each source must be listed as a separate reference. Provide the full names of all authors; the use of et al. is not allowed. Follow the IEEE reference style strictly. A minimum of 15 scholarly references is required for each article. All references listed must be cited within the main text of the manuscript. References not cited in the body of the article are not allowed to appear in the reference list.
