Abstract, keywords:
(not more than six)

10-points
Times New Roman
Single paragraph

Abstract. All articles *must* contain an abstract. The abstract text should be formatted using 10 point Times or Times New Roman and indented 25 mm from the left margin. Leave 10 mm space after the abstract before you begin the main text of your article, starting on the same page as the abstract. The abstract should give readers concise information about the content of the article and indicate the main results obtained and conclusions drawn. The abstract is not part of the text and should be complete in itself; no table numbers, figure numbers, references or displayed mathematical expressions should be included. It should be suitable for direct inclusion in abstracting with **a maximum 350 words** in **a single paragraph**. Since contemporary information-retrieval systems rely heavily on the content of titles and abstracts to identify relevant articles in literature searches, great care should be taken in constructing both.

Keywords: Wind turbine, Performance, Wind tunnel test, Computational fluid dynamics

Authors are required to follow the guidelines above. Please add your abstract content directly into this template and delete all the instructions (text boxes and red texts) after completed. Paper size (A4) and margins of this template should not be modified.
