

Dear colleagues,

As we approach the culmination of 2023, it's with great satisfaction that we reflect on a truly inspiring year for the Belgian Society for Neurorehabilitation.

After a pandemic pause, we were able to organize the International **Congress on Neurorehabilitation and Neural Repair** in Maastricht again, in a collaboration with the Dutch, Belgian and German Societies for Neurorehabilitation and the Association of Chartered Physiotherapists in Neurology in the United Kingdom. Already the 4th edition of an international conference with many inspirational sessions and lots of networking possibilities! We look already forward to the next edition in 2025, held on May 14-16 2025!

We had a very inspiring **lunch webinar** with a debate on the question whether artificial intelligence will change neurorehabilitation within the next 10 years. A lively discussion between experts defending the yes-side and the no-side. They ended up in a collegial conclusion...

Welcome to the homepage of the Belgian Society for Neurorehabilitation

Behind the scenes, we worked on our **strategy plan** for the next coming years. We are very pleased to share the result of the first action of this strategy: the birth of our new website! The website needs to be further filled with the results of our actions of the next coming year(s). Check it out on www.bsnr.org and catch already a glimpse of the actions being on the way.

Looking ahead to 2024, mark your calendars for our **face-to-face symposium** on June 1st in Brussels. Themed "Neurorehabilitation Excellence: Calling in the Specialists," the event will feature contributions from experts in hypersensitivity, real-world monitoring, dysphagia, and transcranial direct-current stimulation. Be prepared to be inspired, network with peers, and share your research. Stay tuned for the detailed program and registration information.

We express sincere **gratitude for your trust** in our organization. We eagerly anticipate continuing our mission to advance best clinical practices and foster cutting-edge research in neurorehabilitation for individuals with acquired neurological disorders.

We look forward to meeting you in 2024—a year destined for **BSNR's 10 years' celebration!**

Warm wishes,

Daphne Kos

BSNR President, on behalf of the [entire BSNR board](http://www.bsnr.org)
