

Wolfcon follow up:

Finish Instance UX design review - administrative metadata section, others?: Laura, ~~Lynn~~, Christie, Kimie & Charlotte (also week of 5/14 if possible) - Charlotte will schedule: **Tuesday May 22, 12:00-1:30 pm EST / 6:00-7:30 pm CET** - Join URL: <https://zoom.us/j/150126585>

Holdings & Item UX design review with Kimie (week of 5/14 if possible - invite rep from RA (Andrea L) & RM(?) SIGS) - Charlotte will schedule: **Thursday May 24, 9:00 - 10:30 am EST / 3-4:30 pm CET** - Join URL: <https://zoom.us/j/741746115>

Request from Kimie: review Instance/Holdings/Item editing interface to make sure all data elements are accounted for. Review against the *MM SIG Working Groups - Metadata Elements and MARC mapping* spreadsheet:

<https://docs.google.com/spreadsheets/d/1kdYx63J0KogR3-LUHuPAzERgj8WE0OQ08rzuCaJaHwS/edit#gid=952741439>

Review Instance/Holdings/Item metadata elements list to ensure all elements in UX are listed.

- publisher role (264 indicators) is missing
- contributor role (subfield e / j / 4) is missing? Or not mapped? - CW: captured in Jira: [UIIN-49](#), [FOLIO-1151](#),

MM-SIG members map data elements in their system against FOLIO Instance/Holdings/Items data elements (Christies spreadsheet) -

Christie will follow up with Product Council to put a call out to other SIGs

Package record subgroup -- contact Laura if interested; will need to refine use cases & recommend model (1-2 meetings?)

Define Inventory use (scope the Inventory) - draft definition:

https://docs.google.com/document/d/16C83Yy61GVm9dYs7aRKj9Z0on-vEuBcfXiCjuo_jALo/edit

MM-SIG to review, Lynn/Dracine will take to Product Council (cross-SIG understanding)

Define/Identify the Instance, Holdings & Item metadata data elements needed in Inventory to support Inventory use (above definition)

Create Data dictionary for Instance/Holdings/Items data elements include the following:

Record : Data element name : brief description of content (Jacquie S. & Patty W?)

Glossary of terms:

FOLIO-native elements defined

Christies mapping group meets to discuss gaps from local system to FOLIO mapping (in light of Data dictionary & Inventory use definition)

- Identify gaps from local system to Instance/Holdings/Item data elements
- Identify local data elements that probably should be stored in other FOLIO apps (circulation; acquisitions; loans; etc.)
- Identify those “other FOLIO app” elements that need to be *displayed* (not stored) in Inventory

MARC mapping subgroup reconvenes to look at missing elements & elements identified in UX review:

- Derive publisher role off of 264 indicators - populate publisher role element in Inventory
- Derive URL label off of 856 indicator - populate “Type of link” element in Inventory
