

## Sixth Grade Resources

Below are some extra resources for students to work on practicing math fact skills. These apps the students have on their Ipads and are connected through Clever.

99 Math- This site allows students to practice math facts and other skills that we are working on in class if they are assigned to them by me.

XtraMath

XtraMath- This site allows students to practice their basic math facts.

Khan  
Academy

Khan Academy- This site has activities assigned to the students that may work on current math skills as well as enrichment skills to help further their mathematical thinking.

**When students are absent: App found on their Ipads.**

Schoology contains Mr. Morgan videos that correlate with our Lessons in the student workbooks. We have updated to the 3rd Edition, but the 2nd Edition videos are very similar to our current activities. These are helpful if the student is not understanding the concepts when

trying to catch up with work at home. The lesson videos can be found under each corresponding Unit and Lesson.
