AVATAR THE LEGEND OF AI 2

Promt gambar :

A realistic Asian male (using 100% exact facial likeness from the reference photo) stands calmly on a futuristic rooftop at the edge of Jakarta during sunset, surrounded by soft glowing energy from the four elements. He is wearing a modern martial-arts long robe, its length just above the knees, giving it a more agile, combat-ready look. The robe's colors remain deep blue, crimson red, and black, arranged in a refined and balanced design. It features a high, elegant collar (krak) that covers his neck, lending both protection and dignity.

Around him, the four elemental energies begin to awaken — gentle blue water streams swirl near his arms, fiery orange-red embers flicker near his shoulders, small stones float and rotate near his legs, Thin glowing patterns trace the edges and seams of the robe, echoing the elemental energy surrounding him.

There is a visible white wind effect gentle gusts swirl around him, making the robe flutter lightly and causing small ripples, while faint lines of energy circulate around his body like shimmering currents of air.

Lighting: The cinematic warm orange-pink of sunset mixes beautifully with futuristic neon highlights from the cityscape. The robe's material captures both the sunlight and neon glow, showing its texture and movement in the wind.

Camera: The shot is low and dynamic, capturing his full body (knee-length robe visible) with the Jakarta skyline behind him. This angle emphasizes both his calm composure and latent power.

Atmosphere: A soft haze drifts around him, interspersed with glowing light particles and swirling energy sparks, giving a sense of delicate balance and anticipation — like elemental forces quietly gathering around him.

Detail: Photorealistic rendering, cinematic depth of field, elegant lighting, 8K ultra clarity. The color harmony between the warm sunset tones and the cool neon/elemental energy makes his blue, red, and black robe stand out in a powerful, yet graceful way.

"4-6s": "Camera rapidly pulls back as the four elements merge visually behind and around him. Fire curls upward, water spirals horizontally, earth rises as cracked stone pillars, and wind forms a luminous bluish vortex. These converging forces shape themselves into a cinematic floating poster-style title reading: 'AVATAR THE LEGEND OF AI'. The letters are designed by combining the four elements: fiery strokes, watery shine, rocky textures with glowing cracks, and swirling air light.",

"6-8s": "Camera moves forward and locks focus on the elemental title. Background becomes heavily blurred (strong depth-of-field). The avatar fades slightly into the background while the

title remains mid-air. The four-element animation continues across the text — flames flicker, water ripples, earth cracks glow, and wind rotates in soft blue streams — creating a dramatic movie-trailer final frame."
