

Use of the drawing:

- Under **NO** circumstance the drawing can be used for AI training or NFT.
- The commissions are personal use only.
- Once I'm done with the commission I'll post the final result and tag the client, unless they ask for it not to be tagged or uploaded.
- If the client wants to post the image on the site **X/Twitter**, the format has to be GIF or video. Breaking this agreement and refusing to take down the post means that the client will be blacklisted.

**The reason for this rule is the implementation of the "Edit image" button on any image post from any person that will modify the image with generative AI without their consent.*

Payment process (DMs):

- The client has to pay the first 50% of the commission upfront to confirm the service.
- The client has to pay the other 50% to receive the final result.
- Once I start working in the commission, a refund won't be possible.
- If the client wants an object/prop that takes half or more space of the piece I'll charge an additional amount. **depending on the complexity of the object the price may change.*

*If you want to use VGen please follow the instructions of the page.

Deadlines and delivery format:

- The piece will be delivered within a month starting from the payment day, the deadline applies to one piece at the time and resets once I'm done with each piece.
- The revision process passes through 3 check-ins before sending the final result: Sketch, Lineart and Flat colors.
- The client can ask as many changes they want on the **Sketch stage**.
- **If the order is on Sketch style the client will only be able to ask for corrections on the first check in [Sketch stage]*
- Once the client is satisfied and has fully paid the commission I'll send a google drive link with three or more versions of the drawing. **white background, transparent background and a watermark jpg.*
- In the case the client orders more than one piece, I'll work in one of them at the time.

Miscellaneous clarifications:

- Background prices depend heavily on the complexity, please be specific when requesting.

- It's one slot per person, not per piece, so one person can ask for multiple pieces.
- Normal slots and Chibi slots work fundamentally the same but are treated as different lists to keep order. That means if one person orders one Icon/Half/Full Body and one Chibi they would take one slot in each list.
- Heavily detailed clothes don't raise the price of the drawing.
- The shadow price applies to each character individually.
- Unless it's a fundamental part of the character, I'll consider any organ outside its place as heavy gore. **see Cosmo from Chainsaw Man as example*
- The client can ask me to add a background free of charge as long as it's a photograph/picture or plain color chosen by them.
