

Cut on the lines of the green paper. Starting at bottom of white construction paper, glue one end of a green strip down. Glue the other end down, pushing it towards the previously glued end, to form a bump. Repeat this 2 more times to complete the body of the inchworm, overlapping the end of the previous bump each time. Next make a circle with the last strip of paper. Punch two holes in the top and slide one end of pipe cleaner in each hole. Glue 2 googly eyes on the loop, and draw a smile on, then paste it down, overlapping the end of the last strip of the body.
