

Template for Evidence(s) UI Greenmetric Questionnaire

[2] Energy and Climate Change (EC)

[2.4] Number of renewable energy sources on campus

Solar panel with solar lights

Solar LED Lights with solar panels

Newly acquired solar LED lamps with built-in solar panels

Description

This year, the university has expanded its installation of solar lamps strategically placed across the campus. These lamps, equipped with built-in solar panels, help conserve energy and utilize solar power as a renewable energy source. Through the Land Use Development and Improvement Plan (LUDIP) and the recently approved Climate Change Expenditure Tagging (CCET) system for fiscal year 2025, the university aims to further enhance its sustainability efforts by developing additional renewable energy projects.
