

Exercise 6

Practice using different Painting tools.

- ✓ The painting tools are divided into the three parts, Brush Tool, History Brush Tool and Gradient Tool.
- ✓ Brush Tool: It allows the user to paint on picture with selected color.
- ✓ Pencil tool: It is used to draw free hand lines with hard edge.
- ✓ Color Replacement tool: It replaces original color of an image with the foreground color.
- ☐ Mixer brush tool: It allows you to paint more realistically in Photoshop.

- ☐ History Brush Tool: It allows you to restore parts of an image to an earlier state by painting over them.
- ☐ Art History brush tool: It allows users to apply styles to your image using history state or snapshot as the source.

- ☐ Gradient Tool: It creates a gradual blend between multiple colors.
- ☐ Paint bucket tool: It fills an area of image based on color similarity.
- ☐ 3D material drop tool: Lets you sample material from one area and then drop it into another area of your model, mesh or 3D layer.

□ Brush Tool:

Step 1: Choose foreground color.

Step 2: Select the brush tool.

Step 3: Set tool options for mode, opacity, flow in option bar.

Step 4: Set the brush size as 116 px and hardness as 100%. You can set overlay as mode and opacity, flow is 100%.

History Brush Tool and Art history Brush Tool:

Step 1: Add an Image to Photoshop. Choose Window>History. History panel will appears. Click the left column of the state/snapshot to use as source for Art history brush tool. A brush icon appears next to source history state.

Step 2: Select Art history brush tool from tool panel.

Step 3: Adjust the Brush size, opacity and style.

Step 4: Dragging brush over the image and make it blur.

Step 5: Restore the area using history brush tool. Select history brush tool from menu. After selecting the tool, drag the brush over the selective area of the image and restore it.

☐ Gradient Tool:

Step 1: Choose File>New.

Step 2: This opens new dialog box. I will set width to 600pixel and height to 600 pixel then Click OK.

Step 3: Select Gradient tool from Tools panel. Click in document to set starting point for gradient, then keep your mouse button held down and drag away from the starting point to where you want the gradient to end.

Step 4: When I release my mouse button, Photoshop draws the gradient. Since my Foreground color was set to green and Background color was set to white, I end up with green to white gradient:

Step 5: Clicking the arrow to open gradient picker. It opens gradient picker with thumbnails (first one on left, top row) of all the preset gradients we can choose from. Here I have chosen orange, yellow, orange color again repeat step 3 and you will get result.
