

Manuscript Preparation Instruction-SYSTEMATIC LITERATURE REVIEW NURSING CURRENT: JURNAL KEPERAWATAN

Preparation of manuscripts includes manuscript typing format and content of each part of the manuscript. Writers need to make sure there are no typos in the script. Manuscript format provisions are as follows:

- 1) The manuscript is written 3000-5000 words, font “Times New Roman” in size 12 (except the title-font 14 and abstract-font 10), 1,5 space, in A4 paper size. The margin in each of side is one inch (2,54 cm). Without indents and uses spaces between paragraphs.
- 2) Page numbers are written on the upper right corner.
- 3) Figures and tables are not grouped separately but integrated with the text/manuscript.
- 4) Citations. For citations in the text use APA Style (Authors name).
- 5) References. All references must be in the same format as the ones at the end of this document and the reference list must include all cited literature. References resources must be published in the past 10 years with DOI.

Part of text / manuscript written with the IMRAD order In detail parts.

- 1) Title
- 2) Author data
- 3) Abstract
- 4) Keywords
- 5) Introduction
- 6) Method
- 7) Result
- 8) Discussion (including limitations of the study)
- 9) Conclusion
- 10) Acknowledgements
- 11) References

TITLE

ABSTRACT

The abstract needs to summarize the content of the paper. The abstract should contain at least 70 and at most 200 words. Font size should be set in 10-point and should be inset 1.0 cm from the right and left margins. A blank (20-points) line should be inserted before and after the abstract. Abstract written in Bahasa Indonesia and English. Abstracts must be preceded by **the introduction** (background, issues, and goals). **Methods** (design, sampling, collection method, and data analysis). **The results** which is written is the result of the research obtained to answer the research problem directly. Write one or two sentences to discuss **the results** and **conclusions**. **Recommendations** from the study clearly written.

Keywords: Please list your keywords in this section alphabetically

INTRODUCTION

Introduction provides justification the importance of the research conducted. New thing resulted from this study compared to the previous research results need to be displayed clearly. State one sentence question (research issues) that need to answer all the research activities of the author. Writing introductory does not exceed six paragraph.

METHOD

The method describes the type of the review method (such as scoping review, systematic review), search strategy, inclusion criteria, selection of the study (with figure of PRISMA Flow diagram) , and data analysis.

Example of PRISMA Flow Diagram:

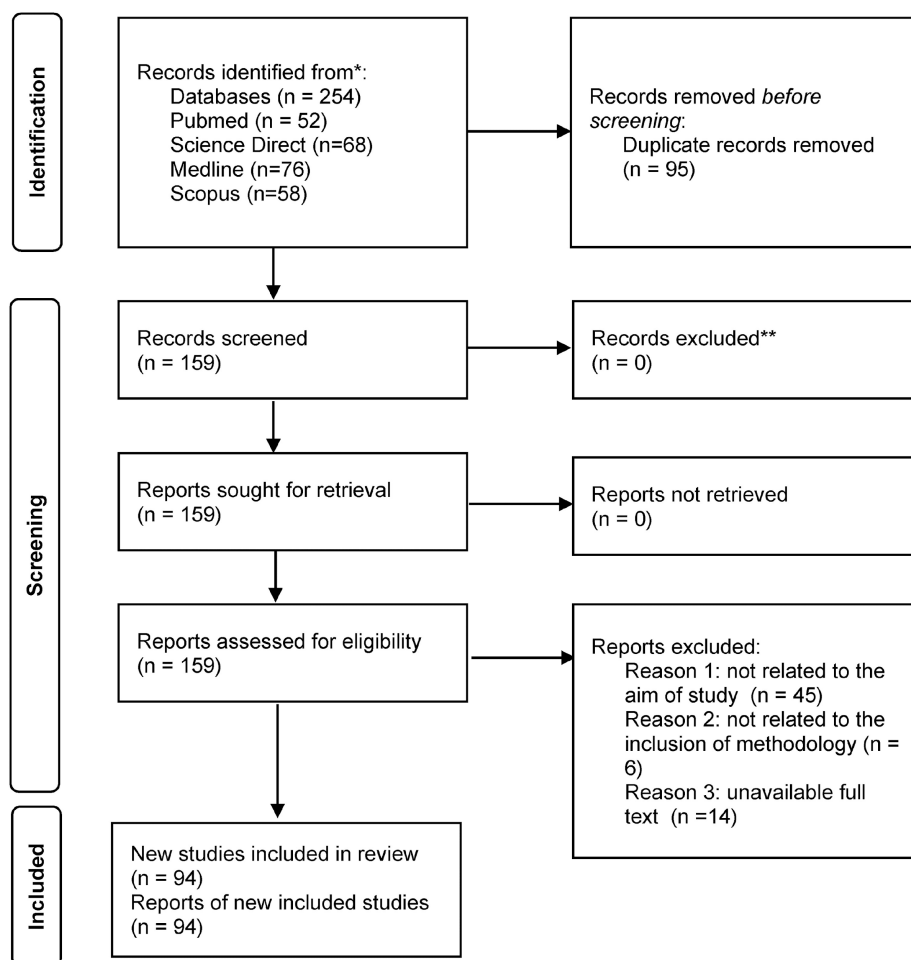

Fig 1. PRISMA Flow Diagram

RESULT

The results stated based on the research goals. In the results do not display the same data in two forms, for example tables/images/graphics. No citations in the results section. All the included tables refer to the main text and the table title and caption are to be positioned above the table. The captions need to be written in Times New Roman, 9pt.

Table 1. Table title. Table captions should always be positioned *above* the tables.

Heading level	Example	Font size and style
Title (centered)	Core	12 point, bold
Table Content		10 point

Figures need to be inserted separately as a .jpg or .png file and must be referred to in the text, for an example see **Figure 1.** [1] Figure descriptions should be placed below the figure and written in Times New Roman, 10pt.

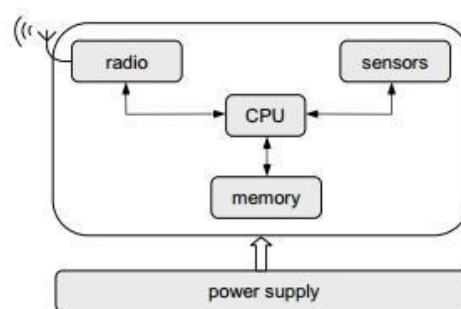

Fig. 1. Architecture of a typical wireless

DISCUSSION

Description of the discussion in a way to compare the current data obtained with the data obtained in the study/review earlier. The discussion focused on the answer to the research aims/questions/hypothesis. Emphasis is placed on the similarities, differences, uniqueness and limited (if any) research results obtained. Researchers also provide the advantages and limitation of the study. The discussion concluded with a recommendation for future studies related to the topic and results.

CONCLUSION

Conclusion is the answer to the hypothesis that leads to research objectives. Researchers need to provide the implications of the result research to clarify the impact of results this research

on the advancement of the scientific field researcher. Suggestions for further research are also written in this section.

ACKNOWLEDGEMENTS

Acknowledgement is given to the source of funding of research (institutional providers, contract number, year revenue) and party/individual who supports the provision of funds. Major parties/individuals that support or assist research is clearly written.
