Latvia

Lithuania

Norway

Sweden

Number of students:

Number of teachers:

Number of ECTS:

Duration in days:

If not all institutions in the network participate in the Joint Study program, list the participating institutions below:

Relevance, objectives and innovation

- A. Present the study programme objectives (what is it aiming to achieve – overall goals and results) and its relevance for the participating institutions, including a description of relevant current conditions, a brief needs analysis, any previous or preparatory work/activities relevant for the programme, and the added value of this specific study programme compared to similar existing study programmes (national and joint). Why is this joint study programme needed? What are the expected learning outcomes?
- B. Describe the complementarity of the partner institutions' competences and previous collaborative experiences relevant for this study programme programme.
- C. If relevant, explain how the study programme will connect or interact with working life and/or research (scientific/artistic).
- D. Explain the innovative aspects of the study programme, e.g. new theme, teaching methods, use of technology, etc.

Your answer here (max 3900 characters) You may not exceed this!

Organization and implementation

- A. Present a work plan for the establishment of the full degree joint study programme, describing division of responsibility and tasks assignment among partners, and progress monitoring.
- B. Describe the current situation on how institutional leadership and management are committed to the establishment and implementation of the full degree joint study programme.
- C. If you are planning a two or three years project and intend to apply for renewed funding next year, please specify which activities you are applying for now, and what activities you wish to apply for later on. Useful guides for joint programmes are available on-line, e.g. nordicmaster.org.
