

1. Make one copy of the "blank" file template that is now "functional" with connections to DIY1.
 - a. Rename it ZAP_{your company_name}
 - b. Open it and click on Nav1 refresh button to trigger Authorization (same authorization process is required for each new copy)
 - c. Relocate to your 10_finance_accounting folder (or comparable)

This represents the section below in RED brackets

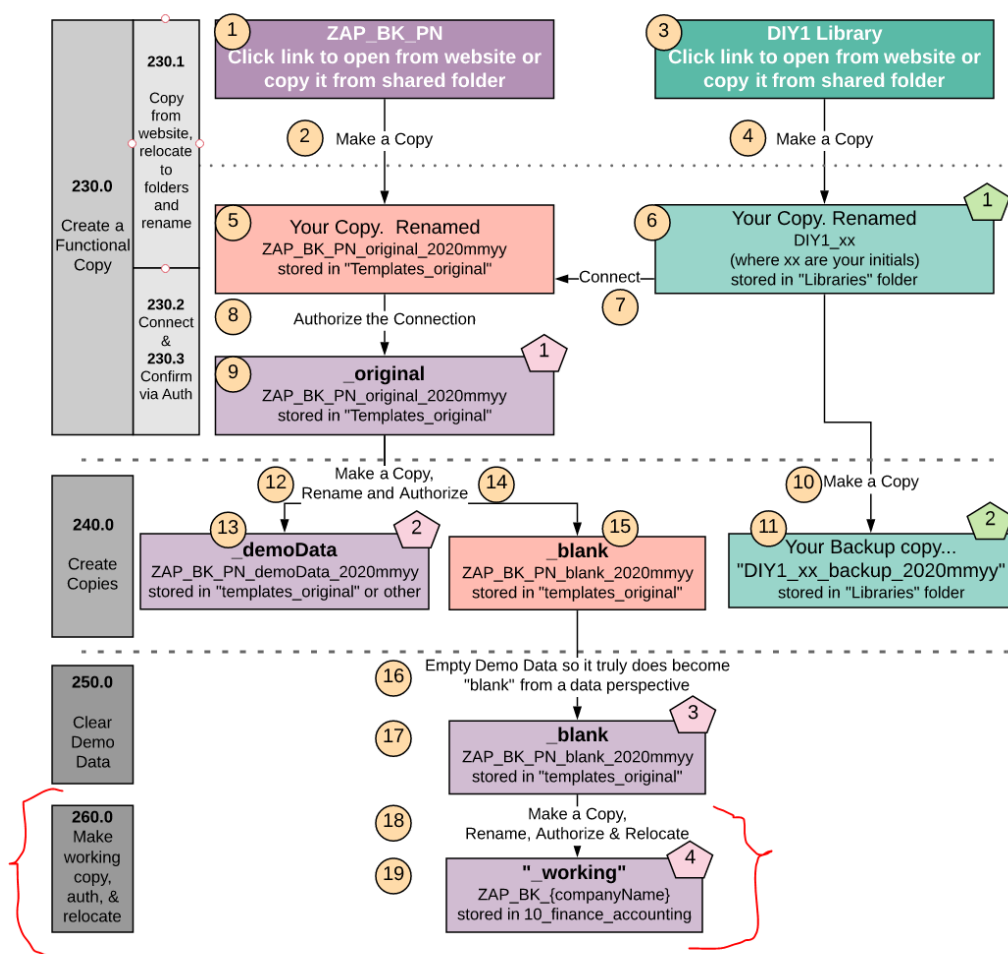

ZAP Accounting Software

Box 5 - Bookkeeping Module

Download and Install

1 of 2

Your goal: FOUR functional copies of ZAP BK PN template and TWO copies of the DIY1 Library.

_Original - Never do anything with this file other than open it to look original programming source code or to make a copy. This is your master reference file
_demoData - Use this for playing with the demo data. It starts out identical as the original and then you can change it. If you ever mess it up, just make another copy of the original.
_Blank - This makes it easy to start more new files without the need of repeating the data clearing process.
_Working - This is where you will start with your own financial data. ou can use this to play with the
