

Cartoon Character

Prompt (9:16 vertical):

Create an original 3D animated preschool character for a children's learning video. The character should have a cute toddler appearance, big expressive eyes, a round friendly face, soft cheeks, a cheerful smile, and a playful personality. Use a high-quality colorful 3D animation style with smooth textures, soft lighting, vibrant colors, and a warm educational cartoon feel. The character should wear a unique colorful outfit with fun patterns and child-friendly details. Make the design original and different from any existing cartoon character.

Scene: a bright, magical preschool environment with colorful toys, books, flowers, and learning objects in the background. The character is standing happily and waving at the camera, creating a welcoming feeling for kids.

Style: premium 3D children's animation, adorable, joyful, wholesome, cinematic lighting, Pixar-quality inspiration, soft rounded shapes, clean design, highly detailed.

Aspect ratio: 9:16 vertical portrait format.

Do not include any logos, brand names, watermarks, text, letters, symbols, or existing cartoon characters.

Negative prompt (if your AI generator supports it):

CoComelon logo, CoComelon text, existing cartoon characters, trademarked characters, copied designs, watermarks, words, letters, brand icons, realistic human style, scary features, dark colors, distorted face, extra fingers, low quality.

This should give you a **kid-friendly 3D preschool character** suitable for YouTube Shorts, ABC learning, nursery rhymes, and educational videos while keeping it original.

Watermark

Prompt:

Create a premium world-class YouTube watermark logo for a children's educational channel named "300Kids". The watermark must be designed specifically for video overlay use.

Design: clean, modern, minimal, and instantly recognizable. Create a friendly kids brand identity with a playful but professional feel. Use a simple original icon that represents learning, imagination, and childhood (for example: a subtle combination of a star, book, smile, or learning symbol) integrated naturally with the text "300Kids".

The logo must have a transparent background (PNG style), with no solid background box, no border, and no unnecessary elements. It should look elegant when placed on top of colorful cartoon videos without distracting children from the content.

Style: premium 3D cartoon branding, soft rounded edges, smooth typography, cheerful but not overly bright, suitable for preschool and kids learning videos. Make it look like a global children's media brand.

Watermark requirements:

- Transparent background
- Compact horizontal design
- Easy to read at small size
- Low visual distraction
- Suitable for bottom-right corner of YouTube videos
- Professional brand quality
- Original design, not similar to any existing kids channel logo

Output: high-resolution PNG logo with transparent background.

Negative prompt:

background, rectangle box, watermark inside a white box, extra text, slogans, copyright symbols, existing brand logos, CoComelon style logo, cluttered design, too many colors, difficult-to-read text, realistic photos, low quality, blurry edges.

Profile Display Picture

Prompt:

Create a world-class YouTube profile picture logo for a children's educational channel named "300Kids". Design it specifically for a circular YouTube avatar crop.

The logo should have a strong central focus with a cute, original, memorable kids mascot character combined with the brand identity. Create a friendly 3D animated child-friendly character (original design) with a happy expression, big expressive eyes, and a playful learning theme. Include subtle educational elements such as a small book, star, pencil, or learning symbol integrated naturally into the design.

Place the text "300Kids" prominently in the center or lower part of the circle using bold, rounded, child-friendly typography that remains readable when displayed as a small YouTube profile image.

Style: premium global children's media brand, high-quality 3D cartoon animation, colorful but balanced, warm, joyful, trustworthy, modern, and professional. The design should feel suitable for preschool learning, alphabet songs, nursery rhymes, and educational videos.

Composition requirements:

- Designed for a circular profile picture
- Main character and logo elements must stay inside the safe center area
- No important details near the edges
- Clear visibility at small size
- High contrast
- Memorable brand identity

Background: clean, colorful gradient or simple playful background that works well inside a circle.

Output: high-resolution square image, 1:1 aspect ratio, optimized for YouTube profile picture.

Negative prompt:

rectangular logo, wide banner, tiny text, text cut off by circle crop, elements touching edges, existing cartoon characters, CoComelon logo, brand copies, watermark, extra words, messy design, low quality, blurry, dark theme, realistic photography.

Recommended settings:

- Aspect ratio: **1:1**
- Resolution: **1024 × 1024**
- Keep the face/logo in the middle
- Use only **"300Kids"** as text (no slogan) because small profile pictures cannot display long text clearly.

Prompt – Image to Video

10-Second Educational Video Prompt (9:16 Vertical)

Create a high-quality 10-second 3D animated preschool learning video using the exact same character from the reference image. **Lock the character completely — keep the same face, same big expressive brown eyes, same curly hairstyle, same skin tone, same outfit, same body proportions, and same cute toddler appearance. Do not redesign, modify, or replace the character.**

Scene: The child character is inside a bright, colorful preschool classroom filled with educational toys, books, colorful blocks, puzzles, and learning materials. The character happily walks toward the camera, smiles warmly, waves, and begins a simple learning activity.

Educational activity:

The character holds a large colorful apple and points to it with excitement. A friendly voice says:

"A is for Apple! Apple starts with A. Can you say A?" (Let the Letter float Magically on the Video)

The character claps happily and encourages children to repeat the sound.

Animation style:

Premium cinematic 3D children's animation, smooth natural movements, realistic cartoon physics, soft rounded shapes, expressive facial animation, gentle hand gestures, joyful preschool energy, warm lighting, colorful but clean classroom environment.

Camera:

Vertical 9:16 portrait format. Smooth slow camera push-in toward the character. Keep the character centered and clearly visible. Professional children's educational YouTube Shorts quality.

Quality requirements:

Ultra detailed 3D rendering, natural shadows, realistic fabric textures, smooth skin shading, perfect facial expressions, clean animation, professional studio-quality children's content.

Important restrictions:

- Character identity must remain identical throughout the entire video.
- No AI-looking artifacts.
- No changing clothes.
- No changing hairstyle.
- No extra fingers or distorted hands.
- No strange movements.
- No unrealistic facial changes.
- No logos.
- No text on screen.
- No brand references.
- No watermarks.
- No existing cartoon characters.

Negative prompt:

different character, changed face, changed clothes, different hairstyle, inconsistent character, AI artifacts, blurry face, extra limbs, extra fingers, bad anatomy, creepy smile, unnatural movement, realistic human style, dark scene, scary elements, logos, words, letters, watermark, brand characters.

Instructions

Rename all images. With channel brand. For Example

Rename Watermark File Name as :

Channel Name _ watermark i.e 300kids_watermark

Rename Channel Profile Picture as : 300kids_profile_image
