

A Game of the Decade II (2010s) Mock Bracket:

Important Note: I have assumed that eligibility requirements will be the following:

- The game must have been originally released in the 2010s (2010-2019) in North America, regardless of its release date in its country of origin.
- If a game has no version that has been released in North America, its European, Australian (if known), or Japanese release date, in that order of preference, is used to determine its eligibility.
- Enhanced versions are allowed only for games that were originally released in the 2010s in North America (or if the original version was not released in North America), and must be substantially different from the game's original version (ex. The Binding of Isaac: Rebirth).
- If a game had an alpha, beta, or other test version available prior to the full version's release, only the full version's release date is considered.
- Only games from 2018 and before are included, because I cannot guarantee sufficiently strong reception (or even releases on schedule in some cases) for 2019 games.
