

## Letter to Driver

Situation: Beautiful day, sun is out and the day is clear. You decide your going to go for a bike ride to soak up some fresh air and get some exercise. You leave your driveway, looking both ways and start toward the park. 1 block from the park a car flies out of nowhere from behind you and hits you.

The ambulance shows up to take you to the hospital because both of you legs are broken and your left arm. You will now have to miss at least a week of school and the prospect of playing basketball and baseball this year do not look at all possible. The legs will take a long time to heal and you will need physical therapy and another surgery to complete your healing process. This will be a long and painful experience and you will need help for a few months time.

The driver that hit you was tested and was positive for being intoxicated. Write a letter to this person and tell them how you feel. Tell them the issues you have and may have in the long run.

The letter must be at least 3 paragraphs of 5 sentences in each.
