USA BIOLympiad

2025-26

Biology Olympiad

Category: STEM

As the premier biology competition for high school students in the United States, the USA Biolympiad (USABO) enriches the life science education of nearly 12,000 talented students annually. The USABO is open to EVERY school in the USA. It provides students with the motivation, curricular resources, and skills training to take them beyond their classroom experience to the level of international competitiveness. After two rounds of challenging exams, twenty Finalists are invited to a residential training program where they learn advanced biological concepts and exacting lab skills at the USABO National Finals. Ultimately, four students earn the right to represent the United States as the USA Biolympiad Team at the International Biology Olympiad (IBO), a worldwide competition involving student teams from over seventy countries.
