

1. CREATE A SHORTCUT OF THE PROGRAM "VALORANT"

- Open the folder C:\RiotGames\VALORANT\live (or the folder where your VALORANT is installed)
- Create a shortcut of the "VALORANT" application and move it to your desktop

2. IN PROPERTIES, ADD THE BELOW TO THE END OF THE TARGET LINE

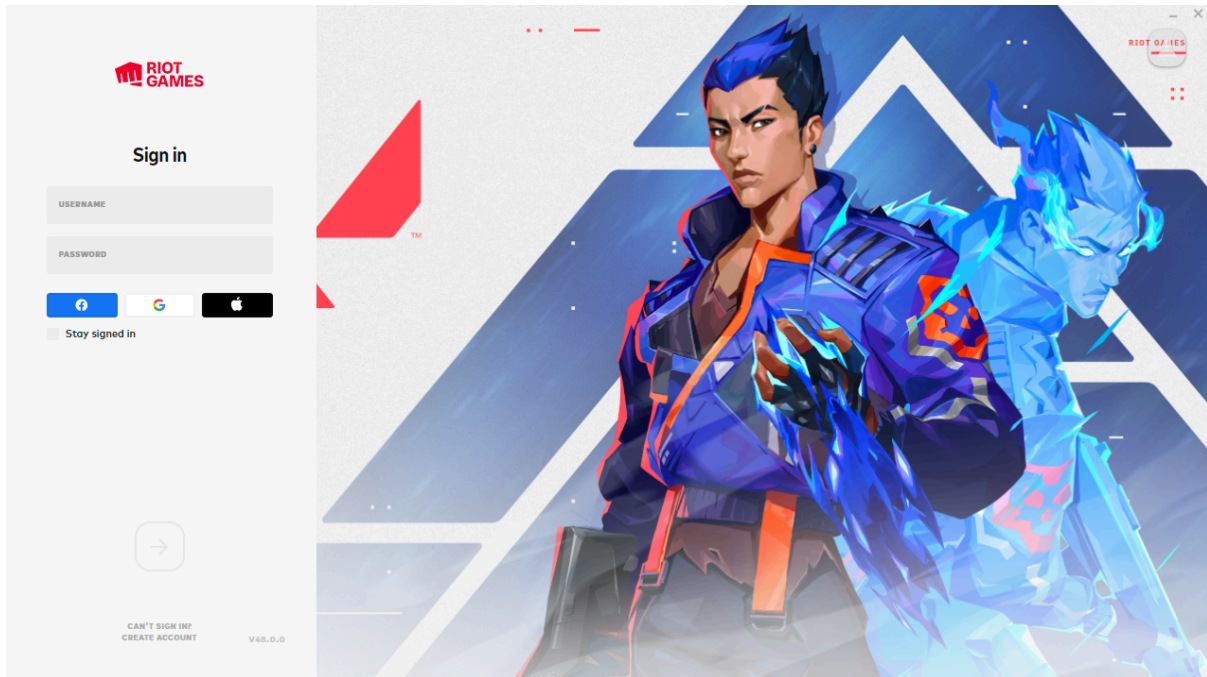

- " --disable-auto-launch"

3. THE TARGET SHOULD NOW READ SOMETHING LIKE THIS:

- ""C:\Riot Games\Riot Client\RiotClientServices.exe"
--launch-product=valorant --launch-patchline=live --disable-auto-launch"
- Note: Make sure there is a space between .exe and --launch

4. SIGN INTO VALORANT

5. CLICK THE DROP DOWN BOX AND SELECT THE PATCHLINE

- Make sure that the correct Patchline as determined by the TO is selected and you are not downloading any other update.

6. RUN VALORANT LAUNCHER AND SELECT THE PATCHLINE YOU DOWNLOADED
