Check Current Prices Here

Sony VPL-VW350ES 4K projector is one of Sony's true 4k projectors. When launched it was among the pioneer projectors offering true 4k technology and relatively cheaper than the other in its class at that time. It is fairly large, with a darkish gray tone. It supports various 4k content with absolutely gorgeous results. The projector offers great picture quality, excellent contrast and brightness. The accurate colors and shadow details provides the already excellent picture quality with an extra boost.

The 4k resolution is backed up with some great additional features such as, Sony's Reality Creation (detail enhancement) feature which provides more sharpness and detail to your non-4k content, and Motionflow feature for extra flow and motion, ensuring a sharp and smooth picture quality.

Apart from providing great features for enhancing picture quality, its input lag reduction feature provides excellent platform for gaming. Also you need to look at review optoma hd25 lv projector – [Click Here](#).

Specifications Let's take a look at the specifications of Sony VPL-VW350ES 4K Projector:

- SXRD (3) Technology; [Leisuretheory](#)
- Brightness 1500 lumens

- Zoom Lens Ratio 2.06:1
- Power Zoom/focus
- 3D/Blu-ray 3D
- Lens shift
- Weight (Approx.) 30.86 lb
- Lamp Life N/A

For a complete list of specifications please visit; [Sony](#).

Exterior It is a fairly large projector, with dark gray tone and glossy black around its lens. It is a good looking projector and can blend with your dark home theater. It weighs (approx.) 30.86 lb with dimensions (approx.) 7.7"H x 19.5"W x 18.3"D.

Connectivity The projector provides you with a LAN network connector, a USB connector for firmware update. Pair of HDMI inputs among which only one port (HDMI 2) supports HDCP 2.2. A serial RS232 input using DB 9 connector, an IR input connector and a pair of 12 volt triggers.

The projector does not support wireless connectivity.

Visual Specs Although being an entry-level 4k projector the picture quality, color and detail is absolutely gorgeous. This is where the Sony VPL-VW350ES 4K Projector really shines. It has an absolutely stunning display. With 4k resolution, it provides that extra pixels for excellent sharpness and detail in picture quality and texture. Its brightness and contrast is great. Add that up with Reality Creation (RC) which is Sony's detail enhancement and sharpening feature, it upscales the non 4K-content to a new level by providing excellent contrast, colors and image quality. The extra pixels that 4K provides give your non-4K content with extra boost. So you can grab your old 1080p content and watch it again with a whole new experience.

With MotionFlow feature you are provided with the smoothness your content needs. The feature adds extra motion and smoothness; it is great for certain type of content/videos which require a little more motion and flow to look smooth.

The brightness is up to the mark and great for home theaters. If you want dimmer brightness, with "Low Lamp" mode you can reduce the overall light output.

It complies with Full-HD standard, and comes up with a built-in 3D transmitter as well. It can upscale your 2D content to 3D. But the brightness can be a little low for 3D content.

As LCoS projectors (most of them) have input lag issues, making them poor for genuine gamers. Sony VPL-VW350ES 4K projector provides the Input Lag Reduction feature which significantly reduces the lag and makes it great for gamers. So it can be an excellent choice for genuine gamers looking for a 4k projector.

It's important to mention here that Sony VPL-VW350ES 4K Projector have no manual or dynamic iris; [Beng](#). The black level performance is good but may be not that great when compared to other Sony projectors with iris. So this projector might not fulfill your expectations if you are looking for a perfect home theater experience.

Price The current price of the projector could not be confirmed from authentic sources but it might be available through third parties and the price could vary. You may also find used projectors in market.

Positives Let's take a look at the positives of the projector:

- It's a true 4k projector and great for users who want to enjoy 4k home theater on an average budget.
- Good for both 4k and non-4k content. The upscaling of the projector is absolutely stunning, which gives your non-4k content with extra picture quality.
- Excellent colors and natural skin tone.
- The brightness level is excellent.
- Great for smaller home theater setups as it provides flexibility in positioning. 2.06:1 zoom and lens shift ensures the projector can be used in smaller rooms/home theaters.
- Power lens features.
- MotionFlow feature to add more smoothness in picture quality.
- Input Lag Reduction Feature significantly reduces the input lag and makes it great for gaming.
- The remote control is good and great on-screen menus.
- Support for anamorphic lens; [Projectorcentral](#)

- 3D, with 2D to 3D conversion.
- Low on noise, even with fan and lamp on full power mode.

Negatives Some of the shortcomings of the projector:

- Despite the great picture quality and colors, the black level performance cannot be considered the very best.
- The projector comes with no dynamic or manual iris.
- No lens memory, so switching to different aspect ratio can be a little inconvenient.
- No built-in speakers.
- A little short on brightness for 3D content.
- No wireless connectivity.

Summarizing Though Sony VPL-VW350ES 4k Projector might fall short in some of your expectations but overall it's a great projector. It is one of the pioneer projectors to provide 4K resolution and certainly lives up to it. The picture quality and detail are the finest you can see, along with great colors, brightness and contrast. The additional features are great. It also provides an excellent 4k platform for genuine gamers.

It is an entry-level 4k projector and obviously can't be compared to some of Sony's more advanced projectors but it still provides remarkable picture quality and can still be a good choice for home theaters.
