

RESEARCH METHOD

General background of research, general background of research, general background of research, general background of research, general background of research, general background of research, general background of research, general background of research, general background of research, general background of research.

General description of research is important in order to show the basis of the research. It is like a very brief introduction to the methodology section as a whole.

Research Method consist of participants, instrument and procedures, data analysis. Research method consist of participants, instrument and procedures, data analysis.

Sample of research, sample of research, sample of research, sample of research, sample of research, sample of research, sample of research, sample of research, sample of research, sample of research, sample of research.

Instrument and procedures, instrument and procedures, instrument and procedures, instrument and procedures, instrument and procedures, instrument and procedures, instrument and procedures.

Data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis. Etc.

This section provides all the methodological details necessary for another scientist to duplicate your work. For the qualitative research this part can be different. „Research Methodology“ chapter should convince a reader that this manuscript presents a solid and sound analysis.

RESULTS AND DISCUSSION

Results

Research results, research results, research results, research results, research results, research results, research results, research results.

Table 1. Tables and figures should be valuable, relevant, and visually attractive.
(Sub-titles (Subchapters) 12pt, Centered)

Statements and subscales	Cronbach- α	KMO	L	r/itt	Dissemination %
XX	x	x	x	x	%
XX	x	x	x	x	%
XX	x	x	x	x	%

After the table and figure, press Enter once to continue the sentence in a paragraph. Figures should be *carefully* explained in the text and cited in numerical order.

Figure 1. Comparison of success rate of items in the experimental and control class.

Figure 2. Clear line drawings are essential.

Research results, research results, research results, research results, research results, research results, research results. Results should be presented in details and discussed accordingly without any mix with other studies.

Discussion

Discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion, discussion.

The objective here is to provide an interpretation of your results and support for all of your conclusions, using evidence from your experiment (research) and generally accepted knowledge, if appropriate. Suggest future directions for research, new methods, explanations for deviations from previously published results, etc.

The objective here is to provide an interpretation of your results and support for all of your conclusions, using evidence from your experiment (research) and generally accepted knowledge, if appropriate. Suggest future directions for research, new methods, explanations for deviations from previously published results, etc.
